Nineteen Eighty-Four: Science Between Utopia and Dystopia E. Mendelsohn, H. Nowotny, 2012-12-06

Just fifty years ago Julian Huxley, the biologist grandson of Thomas Henry Huxley, published a book which easily could be seen to represent the prevailing outlook among young scientists of the day. *If I were a Dictator* 1934. The outlook is optimistic; the tone playfully rational; the intent clear: allow science a free hand and through rational planning it could bring order out of the surrounding social chaos. He complained, however, "At the moment science is for most part either an intellectual luxury or the paid servant of capitalist industry or the nationalist state. When it and its results cannot be fitted into the existing framework it and they are ignored and furthermore the structure of scientific research is grossly lopsided with over-emphasis on some

kinds of science and partial or entire neglect of others pp 83 84 All this the scientist dictator would set right A new era of scientific humanism would provide alternative visions to the traditional religions with their Gods and the civic religions such as Nazism and fascism Science in Huxley's version carries in it the twin impulses of the utopian imagination Power and Order Of course it was exactly this vision of science which led that other grand son of Thomas Henry Huxley the writer Aldous Huxley to portray scientific discovery as potentially subversive and scientific practice as ultimately enslaving *Othring in Science-Fiction* Daniel Muchaier, 2020-10-08 Seminar paper from the year 2020 in the subject English Language and Literature Studies Literature grade 1.0 University of Cologne Englishes Seminar course Postcolonial Science Fiction language English abstract This paper analyzes the implementation of the postcolonial concepts of othering and dehumanization in the Black Mirror episode Men Against Fire 2016 The concepts are outlined in the first chapters and later applied to the text and subtext of the episode The author focuses on individual identity and group identity formation processes in group favoritism and out group homogeneity othering and dehumanization as inter group discrimination and the role of language and names in regard to human identity Play in Utopian and Dystopian Fiction Matthew Leggatt, 2025-07-28 Play in Utopian and Dystopian Fiction is a wide ranging and interdisciplinary study of the different forms of play to be found in depictions of radically better and radically worse societies across literary filmic and televisual texts The book sets out to dismantle common myths about the role of play in such fiction by arguing that far from being dull and static utopias are primarily playful and dynamic In contrast in the twentieth and twenty first centuries dystopian fiction has been popularized by reader and audience expectations of spectacular and exciting action but in this book such readings of dystopia are also challenged Accompanying this is a discussion about labor and its role in relation to a future society that might privilege play over work The book covers texts as diverse as Thomas More's original 1516 travel narrative Utopia and South Korean Netflix dystopian hit Squid Game 2021 25 It consists of chapters detailing the nature of play in utopian fiction the connection between utopia and stasis dystopian forms of violent and deadly play boring dystopias the absurd in utopian and dystopian fiction and finally the future of play promised by new digital utopias and made possible by videogame technologies

Science Fiction and the Historical Novel Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches Science Fiction and the Historical Novel asks what the past can offer a future oriented world and how

the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present
