Wickramasinghe, Nilmini

1journal Impact Factor Ranking:

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011

Clinical Informatics Board Review and Self Assessment Scott Mankowitz, 2018-02-08 The book offers an introduction to all the informatics concepts that are represented on the Clinical Informatics Board Examination The core and direction of this book is to mirror the model of clinical informatics which is used by the American Board of Preventive Medicine to create their exam Unlike any other text on the market the book includes simulated exam questions to help the reader assess his knowledge and focus his study Clinical Informatics Board Review and Self Assessment is a thorough practical assistant to refine the reader's knowledge regarding this youngest and possibly broadest fields of medicine

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they

obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

Engineering Education and Management Liangchi Zhang, Chunliang Zhang, 2011-11-25 This is the proceedings of the selected papers presented at 2011 International Conference on Engineering Education and Management ICEEM2011 held in Guangzhou China during November 18-20 2011 ICEEM2011 is one of the most important conferences in the field of Engineering Education and Management and is co organized by Guangzhou University The University of New South Wales Zhejiang University and Xi'an Jiaotong University The conference aims to provide a high level international forum for scientists engineers and students to present their new advances and research results in the field of Engineering Education and Management This volume comprises 122 papers selected from over 400 papers originally submitted by universities and industrial concerns all over the world The papers specifically cover the topics of Management Science and Engineering Engineering Education and Training Project Engineering Management and Other related topics All of the papers were peer reviewed by selected experts The papers have been selected for this volume because of their quality and their relevancy to the topic This volume will provide readers with a broad overview of the latest advances in the field of Engineering Education and Management It will also constitute a valuable reference work for researchers in the fields of Engineering Education and Management

Research for Medical Imaging and Radiation Sciences Euclid Seeram, Robert Davidson, Andrew England, Mark F. McEntee, 2022-01-03 This book addresses essential principles of research according to the scientific method for medical imaging technology research The scope of this book covers the nature of scientific research quantitative and qualitative approaches essentials research planning literature review fundamentals research methods data collection analysis and interpretation and communicating research findings The book meets the educational requirements on Research Principles and Concepts for entry to practice of the following professional radiologic technology associations the American Society of Radiologic Technologists ASRT the Canadian Association of Medical Radiation Technologists CAMRT the College of Radiographers in the United Kingdom and radiography societies and associations in Asia Australia Europe and Africa This is an ideal book for radiologic technologists nuclear medicine technologists and radiation therapists seeking to get started in research in their profession Additionally biomedical imaging engineering technologists radiologists and medical imaging physicists may use this as a guiding principles textbook

The Culture of Science Education, 2007-01-01 The Culture of Science Education Its History in Person features the autobiographies of the professional lives of 22 science educators from 11 countries situated in different places along the career ladder within an ongoing narrative of the cultural history of the field Many contributors began to identify as science

educators at about the time Sputnik was launched but others were not yet born Hence the book articulates the making of a field with its twists and turns that define a career as a scholar in science education Through the eyes of the contributing scholars the development of science education is seen in the United States and its spread to all parts of the world is tracked leading to a current situation where some universities from overseas are exporting science education to the United States through graduate programs especially doctoral degrees Other key issues addressed are the conceptual personae such as Jean Piaget and Lev Vygotsky who have shaped the field of science education and how publishing in English in high impact journals and obtaining external funds from private and governmental agencies have become driving forces in science education The Culture of Science Education Its History in Person was written for science educators with an interest in the history of science education as it is experienced as lived culture The book is intended as a reference book for scholars and as a text for graduate students involved in science education Global University Rankings and the Politics of Knowledge

Michelle Stack,2021-06-17 For many institutions to ignore your university s ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods Global University Rankings and the Politics of Knowledge exposes how universities became servants to the education industry and its impact Conceptually unique in its scope Global University Rankings and the Politics of Knowledge addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice **World**

University Rankings and the Future of Higher Education Downing, Kevin,Ganotice, Jr., Fraide A.,2016-10-06 Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond **The Business of Scholarly Publishing** Albert N. Greco,2020 Drawing on

an extensive review of the literature and statistical sources The Business of Scholarly Publishing examines the changing environment of scholarly publishing in the United States Albert N Greco analyzes the product price placement promotion and costs including some P L statements of scholarly books and journals from 1945 to the present with a primary emphasis on the period after 2010 **Optimizing Health Monitoring Systems With Wireless Technology** Wickramasinghe,

Nilmini,2020-12-11 The digital transformation of healthcare delivery is in full swing Health monitoring is increasingly becoming more effective efficient and timely through mobile devices that are now widely available This as well as wireless technology is essential to assessing diagnosing and treating medical ailments However systems and applications that boost wellness must be properly designed and regulated in order to protect the patient and provide the best care Optimizing Health Monitoring Systems With Wireless Technology is an essential publication that focuses on critical issues related to the design development and deployment of wireless technology solutions for healthcare and wellness Highlighting a broad range of topics including solution evaluation privacy and security and policy and regulation this book is ideally designed for clinicians hospital directors hospital managers consultants health IT developers healthcare providers engineers software developers policymakers researchers academicians and students **Evaluating Academic Legal Research in Europe**

Rob van Gestel,Andreas Lienhard,2019 Legal academics in Europe publish a wide variety of materials including books articles and essays in an assortment of languages and for a diverse readership As a consequence this variety can pose a problem for the evaluation of academic legal research This thought provoking book offers an overview of the legal and policy norms methods and criteria applied in the evaluation of academic legal research from a comparative perspective *Game*

Theory and Networks Surajit Borkotokey,Rajnish Kumar,Diganta Mukherjee,K. S. Mallikarjuna Rao,Sudipta Sarangi,2022-01-01 This book is a collection of selected papers presented at the consecutively held international conferences on Game Theory and Networks organized by the Department of Mathematics Dibrugarh University India in collaboration with the Economics Department of Queen s University Belfast UK during September 6 9 2019 and September 13 15 2018 The book includes chapters on network measures and network formation application of network theory to contagion biological data and finance and macroeconomics as expository articles The book also contains chapters on fair allocation in the context of queuing rationing and cooperative games with transferable utilities for engaged researchers A few survey chapters on non cooperative game theory evolutionary game theory mechanism design and social choice theory are also incorporated to cater to the needs of the beginners in the field This book discusses the use of game theoretic tools and network models across disciplines mathematics statistics economics computer science political science sociology and psychology It aims at providing a suitable learning experience to beginners on the basics of cooperative games networks and mechanism design as well as recent developments to research scholars having the basic knowledge of these topics *Journals of the Century* Tony

Stankus,2019-12-06 This book first published in 2002 gathers some of America s top subject expert librarians to determine

the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide Their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance Each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract none are in the employ of any publisher but each is fully credentialed and well published and many are award winners The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele Beyond Power Transitions David C. Kang,Xinru Ma,2024-10-08 Questions about the likelihood of conflict between the United States and China have dominated international policy discussion for years But the leading theory of power transitions between a declining hegemon and a rising rival is based exclusively on European examples such as the Peloponnesian War as chronicled by Thucydides as well as the rise of Germany under Bismarck and the Anglo German rivalry of the nineteenth and early twentieth centuries What lessons does East Asian history offer for both the power transitions debate and the future of U S China relations Examining the rise and fall of East Asian powers over 1 500 years Beyond Power Transitions offers a new perspective on the forces that shape war and peace Xinru Ma and David C Kang argue that focusing on the East Asian experience underscores domestic risks and constraints on great powers not relative rise and decline in international competition They find that almost every regime transition before the twentieth century was instigated by internal challenges and even the exceptions deviated markedly from the predictions of power transition theory Instead East Asia was stable for a remarkably long time despite massive power differences because of common understandings about countries relative status Provocative and incisive this book challenges prevailing assumptions about the universality of power transition theory and shows why East Asian history has profound implications for international affairs today The Doctor's Guide to Critical Appraisal Narinder Kaur Gosall,Gurpal Singh Gosall,2012 The Doctor s Guide to Critical Appraisal 3e expands on the best selling second edition with more facts and tips packed into sixty new and updated chapters whilst keeping the unique structure and easy to read format Every chapter focuses on a single topic assuming no prior knowledge Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities Ochoa Ortiz-Zezzatti, Alberto,Rivera, Gilberto,Gómez-Santillán, Claudia,Sánchez-Lara, Benito,2019-04-05 Building accurate algorithms for the optimization of picking orders is a difficult task especially when one considers the delays of real world situations In warehouse environments diverse algorithms must be developed to enhance the global performance relating to combining customer orders into picking orders to reduce wait times The Handbook of Research on Metaheuristics for Order Picking Optimization in Warehouses to Smart Cities is a pivotal reference source that addresses strategies for developing able

algorithms in order to build better picking orders and the impact of these strategies on the picking systems in which diverse algorithms are implemented While highlighting topics such ABC optimization environmental intelligence and order batching this publication examines common picking aspects in warehouse environments ranging from manual order picking systems to automated retrieval systems This book is intended for researchers teachers engineers managers and practitioners seeking research on algorithms to enhance the order picking performance

Understanding and Reducing Landslide Disaster Risk Kyoji Sassa, Matjaž Mikoš, Shinji Sassa, Peter T. Bobrowsky, Kaoru Takara, Khang Dang, 2020-12-21 This book is a part of ICL new book series ICL Contribution to Landslide Disaster Risk Reduction founded in 2019 Peer reviewed papers submitted to the Fifth World Landslide Forum were published in six volumes of this book series This book contains the followings Four Forum lectures and one award paper Sendai Landslide Partnerships Kyoto Landslide Commitment and International Programme on Landslides Landslide induced tsunamis Landslides at UNESCO designates sites and contribution from WMO FAO and IRDR Education and Capacity Development for Risk Management and Risk Governance Prof Kyoji Sassa is the Founding President and the Secretary General of International Consortium on Landslides ICL He has been the Editor in Chief of International Journal Landslides since its foundation in 2004 Prof Matja Miko is the Vice President of International Consortium on Landslides and Vice President of Slovenian Academy of Engineering He is a Professor and Dean of Faculty of Civil and Geodetic Engineering University of Ljubljana Slovenia Dr Shinji Sassa is Head of Soil Dynamics Group and Research Director of International Research Center for Coastal Disasters Port and Airport Research Institute National Institute of Maritime Port and Aviation Technology Japan Prof Peter Bobrowsky is the President of International Consortium on Landslides He is a Senior Scientist of Geological Survey of Canada Ottawa Canada Prof Kaoru Takara is the Executive Director of International Consortium on Landslides He is a Professor and Dean of Graduate School of Advanced Integrated Studies GSAIS in Human Survivability Shishu Kan Kyoto University Dr Khang Dang is the Secretary General of the Fifth World Landslide Forum He also serves as the Research Promotion Officer of ICL and a Lecturer at the University of Science Vietnam National University Hanoi

Recent Advances in Game Theory and Applications Leon A. Petrosyan, Vladimir V. Mazalov, 2016-09-30 This contributed volume contains fourteen papers based on selected presentations from the European Conference on Game Theory SING11 GTM 2015 held at Saint Petersburg State University in July 2015 and the Networking Games and Management workshop held at the Karelian Research Centre of the Russian Academy of Sciences in Petrozavodsk Russia also in July 2015 These papers cover a wide range of topics in game theory including recent advances in areas with high potential for future work as well as new developments on classical results Some of these include A new approach to journal ranking using methods from social choice theory A differential game of a duopoly in which two firms are competing for market share in an industry with network externalities The impact of information propagation in the model of tax audits A voting model in which the results of previous votes can affect the process of coalition formation in a decision

making body The Selten Szidarovsky technique for the analysis of Nash equilibria of games with an aggregative structure
Generalized nucleoli and generalized bargaining sets for games with restricted cooperation Bayesian networks and games of
deterrence and A new look at the study of solutions for games in partition function form The maturity and vitality of modern
day game theory are reflected in the new ideas novel applications and contributions of young researchers represented in this
collection It will be of interest to anyone doing theoretical research in game theory or working on one its numerous
applications

Reconfiguration of Business Models and Ecosystems Svetla T. Marinova, Marin A. Marinov, 2023-02-10

Decoupling of business models and ecosystems is the disconnection of certain characteristic activities originally planned and
completed in coincidence It could bring in an immense adverse shock in the functioning of established business models and
ecosystems possibly bringing them to resilience Core causes for decoupling and resilience of business models and
ecosystems are jolts known as global crisis universal pandemics etc The undesirable outcomes of critical events can reveal
unique circumstances for business model and ecosystem resilience Business model and ecosystem resilience represents a
mandatory prerequisite for firms challenging their functioning and even very existence Research has been conducted thus far
nevertheless this theme requires significantly more consideration The key objective of this book is to bring further insights in
the field delivering a thorough examination of the ways in which business models and ecosystems can develop resilience
under extraordinary conditions In the book the resilience of business models and ecosystems is analysed aiming to
investigate further the specifics of the relevant processes securing resilience and its outcomes The resilience of business
models and ecosystems is scrutinised as a credible way for enhancing the predispositions of firm s survivability Chapter 9 of
