Escobar,2024-05-08 Spend more time studying the most important exam topics and less time searching for them The VSITE Review Manual is a succinct high yield resource designed to help you make the most of your preparation for this challenging exam This streamlined focused review tool makes it easy to find the essential information on each topic you need to master for success on the VSITE Offers a condensed high yield source of critical information for vascular surgery residents and fellows as well as for practicing surgeons who are preparing for the recertification exam Uses an easy to read outline and list format to help you find information quickly and retain what you read and review Features quick references tables images and self assessment questions that enhance and highlight the need to know information in this unique review tool Provides a strong knowledge foundation in vascular surgery helping you increase your confidence as you prepare for the VSITE Any additional digital ancillary content may publish up to 6 weeks following the publication date *Methods of Measuring Moisture in Building Materials and Structures* Lars-Olof Nilsson,2018-04-13 RILEM TC 248 MMB was established in 2012 with the main aim to improve and distribute knowledge related to moisture measurement in construction materials in various scientific and industrial applications Properties and performance of building materials and structures are influenced to a large extent by the moisture conditions in the materials Obvious examples are heat conductivity shrinkage and creep transport properties most types of deterioration discoloration etc For research and applications the moisture conditions must be quantified by measurements in the laboratory or under field conditions There is much variation in methods being used even within the same topic in different countries both with regard to materials and to applications No consensus whatsoever does exist For the construction industry it is important to be able to quantify the moisture conditions in an accurate way in various applications This state of the art report is divided into two parts Principles and Applications with altogether 28 chapters on various moisture measuring principles and a number of applications **Popular Science** ,2003-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better *Proceedings of Third Doctoral Symposium on Computational Intelligence* Ashish Khanna,Deepak Gupta,Vineet Kansal,Giancarlo Fortino,Aboul Ella Hassanien,2022-11-09 This book features high quality research papers presented at Third Doctoral Symposium on Computational Intelligence DoSCI 2022 organized by Institute of Engineering and Technology IET AKTU Lucknow India on March 5 2022 This book discusses the topics such as computational intelligence artificial intelligence deep learning evolutionary algorithms swarm intelligence fuzzy sets and vague sets rough set theoretic approaches quantum inspired computational intelligence hybrid computational intelligence machine learning computer vision soft computing distributed computing parallel and grid computing cloud computing high performance computing biomedical computing and decision

support and decision making Advances in Sustainable Materials and Resilient Infrastructure Krishna R. Reddy, Rathish Kumar Pancharathi, Narala Gangadhara Reddy, Suchith Reddy Arukala, 2022-03-12 The edited book comprises invited book chapter contributions from global experts in the field of sustainable materials and resilient infrastructure. The book covers the most critical and emerging topics for creating sustainable solutions for the construction industry, promoting the technologies and monitoring methods for resilient infrastructure. It focuses on sustainable solutions and offers techniques and methodologies to deliver high quality end solutions in civil engineering. In addition, the content provides knowledge based information for the readers to assess, monitor, measure and practice sustainability for resilient infrastructure. The contents of the volume are a blend of academic research work and industrial case studies. It covers the use of sustainable materials like Lime Pozzolona Binders, biopolymers, lignosulphonate, lightweight aggregates made from fly ash, calcinated clay, paper ash and limestone as amendments/ameliorators for soil remediation, development of neo construction materials and composites for civil engineering applications. Design of innovative pavements using alkali activation and pervious concrete for sustainable infrastructure is also discussed. The chapters also highlight the role of civil engineers in achieving UN Sustainable Development Goals, promoting climate change design for urban landscapes and modelling building energy demand. This book is framed to address the principles and practice from the corners of geoenvironment, sustainable construction materials, low carbon materials, energy efficiency and waste management. It is a valuable reference for faculty, researchers, field experts, scientists and practicing engineers.

Engineering the Plant Factory for the Production of Biologics and Small-Molecule Medicines Domenico De Martinis, Rosella Franconi, Eugenio Benvenuto, Edward P. Rybicki, Kazuhito Fujiyama, 2017-04-27 Plant gene transfer achieved in the early 80s paved the way for the exploitation of the potential of gene engineering to add novel agronomic traits and/or to design plants as factories for high added value molecules. For this latter area of research, the term Molecular Farming was coined in reference to agricultural applications in that major crops like maize and tobacco were originally used basically for pharma applications. The concept of the green biofactory implies different advantages over the typical cell factories based on animal cell or microbial cultures already when considering the investment and managing costs of fermenters. Although yield stability and quality of the molecules may vary among different heterologous systems and plants are competitive on a case to case basis, still the plant factory attracts scientists and technologists for the challenging features of low production cost, product safety and easy scale up. Once engineered, a plant is among the cheapest and easiest eukaryotic system to be bred with simple know how using nutrients, water and light. Molecules that are currently being produced in plants vary from industrial and pharmaceutical proteins including medical diagnostics, proteins and vaccine antigens to nutritional supplements such as vitamins, carbohydrates and biopolymers. Convergence among disciplines as distant as plant physiology and pharmacology and more recently as omic sciences, bioinformatics and nanotechnology increases the options of research on the plant cell factory. Farming for Pharming biologics

and small molecule medicines is a challenging area of plant biotechnology that may break the limits of current standard production technologies The recent success on Ebola fighting with plant made antibodies put a spotlight on the enormous potential of next generation herbal medicines made especially in the name of the guiding principle of reduction of costs hence reduction of disparities of health rights and as a tool to guarantee adequate health protection in developing countries

Circularity of Cementitious Materials Christian Paglia,2025-08-18 Recycling of materials in building and infrastructure applications are global concerns driven by natural resource preservation needs of modernized countries and sustainable development of emerging countries This practical book explores the strategies necessary for successful recycling of cement based materials to achieve sustainable and long service life It investigates recycled cementitious materials to ensure decisive implementation and meet industry and societal challenges Presents the state of the art in recycling one of the most used materials in today s construction sector Covers construction and demolition waste and recycled concrete UHPC and road base material Aimed at readers in materials civil and construction engineering this book offers guidance to professionals and researchers developing strategies for sustainable application of cement based materials

The Routledge Handbook of Architecture and Anthropology Marie Stender,Claus Bech-Danielsen,Aina Landsverk Hagen,Madlen Kobi,Ying Zhou,2025-11-28 This handbook provides fresh insights into the debates and challenges that unfold in the cross disciplinary field of architecture and anthropology Based on studies of empirical contexts across the globe the authors launch and test a broad variety of methods and advance various theoretical concepts Architecture and anthropology have always had overlapping interests but a range of developments in both areas make it more relevant than ever to intersect overlap combine or even merge the two disciplines In anthropology the spatial material and nonhuman turns have paved the way for an increasing interest in and need for of changing the world rather than just studying it On the other hand architecture beyond designing structures has become interested in the uses and processes that unfold in during and after construction The contemporary research and practices in both disciplines are testimonies that a cross disciplinary exchange is inspiring for engaging with and responding

to the challenges of a world in ecological societal and political turmoil This handbook addresses established scholars students and practitioners alike by outlining contemporary developments and tensions at the intersection of architecture and anthropology

Concrete Permeability and Durability Performance Roberto J. Torrent,Rui D. Neves,Kei-ichi Imamoto,2021-12-22 Durability and service life design of concrete constructions have considerable socio economic and environmental consequences in which the permeability of concrete to aggressive intruders plays a vital role Concrete Permeability and Durability Performance provides deep insight into the permeability of concrete moving from theory to practice and presents over 20 real cases such as Tokyo s Museum of Western Art Port of Miami Tunnel and Hong Kong Zhuhai Macao sea link including field tests in the Antarctic and Atacama Desert It stresses the importance of site testing for a realistic durability assessment and details the Torrent Method for non destructive measurement of air permeability It also delivers answers for some vexing questions Should the coefficient of permeability be expressed in m^2 or m/s How to get a mean pore radius of concrete from gas permeability tests Why should permeability preferably be measured on site How can service life of reinforced concrete structures be predicted by site testing of gas permeability and cover thickness Practitioners will find stimulating examples on how to predict the coming service life of new structures and the remaining life of existing structures based on site testing of air permeability and cover thickness Researchers will value theoretical principles testing methods as well as how test results reflect the influence of concrete mix composition and processing

Performance-Based Specifications and Control of Concrete Durability Hans Beushausen,Luis Fernandez Luco,2015-09-24 This work gives an overview of significant research from recent years concerning performance based design and quality control for concrete durability and its implementation In engineering practice performance approaches are often still used in combination with prescriptive requirements This is largely because for most durability test methods sufficient practical experience still has to be gained before engineers and owners are prepared to fully rely on them This book compiled by RILEM TC 230 PSC is intended to assist efforts to successfully build the foundation for the full implementation of performance based approaches through the exchange of relevant knowledge and experience between researchers and practitioners worldwide
