Félix, Christopher M. Pearce, Arnold Rakaj, Ana Pombo, 2025-03-13 Sea cucumbers are echinoderms with key ecological roles in marine ecosystems They are fished worldwide as food and for their various nutraceutical and pharmacological properties Over the years poorly managed fisheries in many countries have led to overexploitation and resulted in local population declines Nonetheless sea cucumber demand shows an increasing trend and consequently fishing grounds have expanded to new regions targeting new species and aggravating the problem It is important to acknowledge that present and future stock depletion is a reality under current exploitation conditions in many countries Aquaculture can have a crucial role in supporting the conservation of natural resources through reduced fishing pressure and wild stock re seeding and thus help meet global sea cucumber demand The historic low economic relevance of sea cucumbers in new fishing regions has left a knowledge gap regarding the biological and ecological aspects of species in those regions knowledge that is crucial for stock management and for developing appropriate rearing techniques Successful approaches to the management of sea cucumbers need to incorporate robust management strategies and mitigation measures that include aquaculture options for potential restocking or for enhanced production potential All these measures need to be developed prepared and applied across diverse user groups The global status and course of sea cucumber exploitation rationalizes the need for an increase in sea cucumber R D Topics like

population status demographics habitat preferences distribution patterns growth strategies reproductive cycles and behavioural or life history traits are understudied but paramount for successful stock management and sustainable fisheries. Additionally the development of sea cucumber aquaculture as an alternative to fisheries to supply international markets has led to a plethora of recent research on the subject. Advances in the successful integration of deposit feeders such as sea cucumbers into rearing systems with organisms at other trophic levels in what is commonly known as Integrated Multi Trophic Aquaculture IMTA have occurred and offer the promise of more efficient and sustainable production methods. All these topics require novel research approaches for the validation and application of these methodologies.

Right to Development and Illicit Financial Flows from Africa Serges Djoyou Kamga, Gerard Emmanuel Kamdem Kamga, Arnold Kwesiga, 2024-02-15 Gerard Emmanuel Kamdem Kamga Serges Djoyou Kamga and Arnold Kwesiga explore a relatively new phenomenon namely referred to as illicit financial flows that aim to impoverish the African continent and prevent its economic development. There is a direct relationship between illicit financial flows and failed initiatives to realize the right to development on the continent. For instance in 2016 Africa received 41 billion towards public development while 50 billion left the continent through illicit financial flows. The gap between recent economic achievements on the continent and its state of generalized underdevelopment coupled with rampant poverty corruption prolonged economic crisis and political instabilities signals an issue with resource allocations. The systematic theft of resources by multinational corporations and criminal networks is a hard blow to the idea of people driven development in line with the Pan African vision of an integrated prosperous and peaceful Africa proclaimed by Agenda 2063. *Right to Development and Illicit Financial Flows from Africa Dynamics Perspectives and Prospects* provides insights into the dynamics and perspectives on illicit financial flows and its dire impacts on the right to development and development initiatives across the continent.

Resilient Religion, Resilience and Heartbreaking Adversity LIT Verlag, 2023-01-05 A resilience theory on religion needs to answer four questions: What defines the kind of adversity which is addressed in religion? What is characteristic for processes of resilience in religion? What defines resilient religion as outcome? Which logic of inference epistemology based on our beliefs and experiences about reality binds these three elements together? The book starts with mapping the field of resilience theory on religion by addressing all four questions. The need for thinking about Christian resilience and the God symbol is addressed and the need to be explicitly contextual with regard to resilience in South Africa. Next three types practices of religious acting are related to experiences of resilience namely preaching narrating and discerning. In the last chapters the focus is on the way stories help to express feelings of experiences of crises tragedy and trauma. But also how stories can help heal the broken heart. Prof Chris A M Hermans is extraordinary professor in practical theology and missiology at the University of the Free State South Africa. He is emeritus professor in pastoral theology at Radboud University the Netherlands and emeritus professor in empirical study of religion at Radboud University the Netherlands. A critical engagement with theological education in Africa Johannes J. Knoetze, Alfred R. Brunsdon, 2022-02-07 The higher education landscape has arguably become one of the most arduous to traverse More so in the African context where a host of variables continuously challenge educators to reflect critically on their philosophies and practices as they engage an ever changing audience In this book a critical engagement with theological education in Africa is offered As the book originates from South Africa it is presented as a South African perspective although contributors are situated accross the African continent and abroad The common denominator is that all contributors are in some way or another invested in theological education in Africa The main contribution of this collaborative work is to be sought in the insights it offers on four main areas of theological education A historical and current orientation on theological education in Africa some paradigm shifts in theological education in Africa ministerial formation needs versus theological education challenges and a critical reflection on elective models and methods The book presents the original and innovative research of scholars for fellow scholars involved in theological higher education as it is grounded in the respective fields of interest of each contributor It contributes to a better understanding of the complex African theological higher education landscape that is also mindful of post COVID 19 realities Methodologically the work draws on a combination of methods including literature studies empirical work and in some cases sectional offerings from doctoral studies as indicated in the various chapters
