Urbicide Fernando Carrión Mena, Paulina Cepeda Pico, 2023-03-23 This book uses the reflection of academics specialized in the urban area of Latin America Europe and the United States to initiate a comparative debate of the different dynamics in which Urbicidio expresses itself The field or focal point of analysis that this publication approaches

is the city but under a new critical perspective of inverse methodology to that has been traditional used It is about understanding the structural causes of self destruction to finally thinking better and then going from pessimism to optimism It is a deep look at the city from an unconventional entrance because it is about knowing and analyzing what the city loses by the action deployed by own urbanites both in the field of its production and in the field of its consumption This suppose that the city does not have an ascending linear sequential evolution in its development but neither in each of its parts in the improvement process showing the face that commonly not seen but others live The category used for this purpose is that of Urbicidio or the death of the city which contributes theoretically and methodologically to the knowledge of the city as well as to the design of urban policies that neutralize it In addition it is worth mentioning that the book has an inclusive view of the authors For this reason gender parity territorial representation and the presence of age groups have been sought

E-salud, autonomía y datos clínicos. Un nuevo paradigma Cristina Gil Membrado,2021-11-16 La revolución digital de la Salud y los nuevos avances de las ciencias médicas constituyen retos de gran calado para el Derecho Nos enfrentamos a un cambio de paradigma que afecta a la determinación de la capacidad para tomar decisiones complejas Estas cuestiones se revelan todavía más complicadas en situaciones en las que concurre la minoría de edad con o sin madurez como en el caso de pacientes con patologías neurodegenerativas o con capacidades cognitivas alteradas Ciertamente es que el paciente en la actualidad cuenta con más información que nunca para erigirse en protagonista de su salud pero el paciente activo está preparado para acceder a la información comprenderla y aplicarla a la toma de sus decisiones En definitiva en qué casos podemos afirmar que el paciente digital es libre y que sus decisiones son fruto de una voluntad consciente y responsable Quien dice el Derecho sobre ello Incide igualmente este cambio de paradigma en la responsabilidad ya que la presencia y la utilización de objetos conectados va a permitir al paciente monitorizar su estado de salud y adoptar un comportamiento en consonancia al conocimiento del mismo En estrecha relación con la autonomía la historia clínica digital brinda la posibilidad de tratar toda la información del paciente con el objeto de coordinar la asistencia A su vez el tratamiento

de los datos que se desprenden de la documentación clínica es una potente herramienta para la investigación biosanitaria. La digitalización de la información médica a gran escala y el tratamiento mediante técnicas big data conllevarán también cambios en los parámetros de imputación de la responsabilidad en tanto en cuanto las herramientas de inteligencia artificial como parte del estado de la ciencia se vayan incorporando a la *lex artis ad hoc*. Este trabajo pretende desde un enfoque multidisciplinar abarcando la Ciencia y el Derecho dar respuesta a las cuestiones que el nuevo paradigma de la e Salud plantea a la autonomía y a la disposición de los datos clínicos sin perder de vista lo que sucede más allá de nuestras fronteras al tratarse de un fenómeno global. Routledge Handbook of Private Law and Sustainability Marta Santos Silva, Andrea

Nicolussi, Christiane Wendehorst, Pablo Salvador Coderch, Marc Clément, Fryderyk Zoll, 2024-06-05 The Routledge Handbook of Private Law and Sustainability reflects on how the law can help tackle the current environmental challenges and make our societies more resilient to future crises. Sustainability has been high on the political agenda since the approval of the Sustainable Development Goals in 2015 and the EU Green Deal in 2019. The Green Agenda aims at making Europe the first climate neutral continent by 2050 but humanity persists in an ecological overshoot that puts at risk the survival of species including that of our own. Drawing together a selection of leading thinkers in the field, this Handbook provides a curated overview of the most recent and relevant discussions for private lawyers related to environmental and sustainability concerns. The authors delve into case study examples from 20 countries in Europe and beyond and discuss a wide range of issues including new property law and consumer law paradigms, the use of legal tech for promoting sustainable property management strategies for fighting planned obsolescence, eco design, the servitisation economy, advances on corporate climate litigation and mandated green private sludges. Overall, the volume is designed to empower new generations of legal scholars to take an active role in the transition to a more sustainable future. It will also assist policymakers in producing better policy through pinpointing the main legal issues that need to be addressed and offering a comparative overview of legal solutions and best practices. Divided into six key parts and overseen by a team of internationally recognised expert editors, this Handbook will be an essential resource for students, scholars, private lawyers and policymakers who wish to have a comprehensive fundamental overview of how environmental sustainability concerns reflect on private law. *Local*

Governance in Spain Ángel Iglesias Alonso, 2022-11-08 The book addresses in detail local governance in Spain. In recent decades, local governments in Europe have increasingly found themselves under pressure from a multitude of new challenges such as demographic change, climate change, fiscal austerity policies, digitization, the demand for more citizen participation in local affairs and the migration crisis, to name just a few. Consequently, a wave of political and administrative reforms to address these challenges and pressures and problems has changed local governance in many countries. In part, these changes were the result of reform policies introduced by national and state governments, often triggered by austerity policies which has become an overwhelming reality for Spanish local governments that have been forced to introduce innovations in

local governance This book aims to give an account of these innovations in local governance in Spain This book considers the local political administrative structure in its dimensions focusing on the analysis of its party system electoral competition and political behavior in the local arena as well as on local finances all of which are determining elements in urban and rural governance processes On the occasion of the recent crisis unleashed by Covid 19 the book will also deal with local governance in crisis situations The book will also contextualize local governance processes in Spain in relation to the trends in local governance observed in other European countries
