Vulnerability and the Organisation of Academic Labour Graham Ferris, Martha Albertson Fineman, 2024-09-20
Vulnerability theory identifies structural and institutional factors that build or undermine the resilience of individuals and organisations. This volume uses vulnerability theory to explore how the organisation of the teaching and research activities of universities impact the resilience of academics and also how these activities themselves are impacted by contemporary developments in universities and educational policy. The starting point of enquiry is that neither academics nor universities are invulnerable and that urgent attention is needed to reverse developments that undermine their resilience. The contributions focus on universities in the US and UK, legal education in the UK, criminal justice in the UK, Brazilian legal education, research in deprived communities and the ethics of medical professionals. This broad range of subjects is connected by use of vulnerability theory to interrogate academic practices and universities as organisations which should build resilience in their workforce and communities and in so doing secure their own resilience but which far too often fail to do so and actually undermine resilience. It is argued this is not due to malefic intentions but to institutional features of the sector and society. Of immediate interest to anyone who works in studies at or relies upon the research mission of universities and to those involved in the management of universities, this book will also be relevant to policy analysts and policymakers who will find value in the reframing of vital issues in higher education policy by vulnerability theory, allowing a more realistic and productive policy environment to develop. This book was originally published as a special issue of *The Law Teacher*.

The Long Walk to Equality Avis Whyte, Patricia Tuitt, Judith Bourne, 2024-02-20
In 1965 the UK enacted the Race Relations Act while the International Convention on the Elimination of all Forms of Racial Discrimination (ICERD) opened for signature and ratification. In the US the changes that brought down the walls of segregation, conveying some equality to black people, essentially began with the Civil Rights Act of 1964. These ground-breaking instruments marked a commitment domestically and internationally by the state parties to the ICERD to address racial injustice and inequality through legal means. Yet the intervening years reveal the challenges of pursuing racial justice and equality through the medium of law. In recent years, allegations of institutional racism have been levelled against numerous public institutions in the UK while the rise of populism globally has challenged the ability of law to effect change. This edited collection draws attention to the need to reflect on the persistence of racial inequalities and injustices despite law's intervention and arguably because of its unconscious role in their promotion. It does so from a multiplicity of perspectives ranging from the doctrinal, socio-legal, critical and theoretical, thereby generating different kinds of knowledge about race and law. By exploring contemporary issues in racial justice and equality, contributors examine the role of law, whether domestic or international, hard or soft, in advancing racial equality and justice and consider whether it can effect substantive change.
