valuation is a problem solving strategy and a problem is a problem it does not respect the boundary of any particular discipline The valuation of regulating services is an evolving field of ecological economics In this book Professor Pushpam Kumar and Professor Michael D Wood have invited some of the foremost international experts in the field of ecosystem services valuation to contribute chapters on the valuation of regulating services and highlight some of the main obstacles to the implementation and acceptance of these methodologies in the context of decision making The contributors explore the theoretical underpinning of valuation of ecosystem services and demonstrate ways in which these theories can be applied to case specific problems in order to inform decision making processes This collection clarifies some of the doubt and uncertainty regarding the valuation of regulating services Innovative methodologies in this field have started to emerge and in coming years there may be much further discussion on this topic as methodologies and understanding continue to evolve This is a highly active area of interdisciplinary research with far reaching social and environmental implications and this book should be of interest to those who are new to the field as well as established experts in moving both theory and practice forward

Energy and Behaviour Marta Lopes, Carlos Henggeler Antunes, Kathryn B. Janda, 2019-11-25 Changes to energy behaviour the role of people and organisations in energy production use and efficiency are critical to supporting a societal transition towards a low carbon and more sustainable future However which changes need to be made by whom and with what technologies are still very much under discussion This book developed by a diverse range of experts presents an international and multi faceted approach to the sociotechnical challenge of engaging people in energy systems and vice versa By providing a multidisciplinary view of this field it encourages critical thinking about core theories quantitative and qualitative methodologies and policy challenges It concludes by addressing new areas where additional evidence is required for interventions and policy making It is designed to appeal to new entrants in the energy efficiency and behaviour field particularly those taking a quantitative

approach to the topic Concurrently it recognizes ecological economist Herman Daly s insight what really counts is often not countable

Smart Quintuple Helix Innovation Systems Elias G. Carayannis,David F. J. Campbell,2018-11-21 This volume examines the relationships among social ecology innovation sustainable development and economic growth The Quintuple Helix innovation model focuses on the interactions among five key elements of society academia industry government culture and the environment with particular respect to harnessing knowledge to promote social political and economic development The Quintuple Helix is a powerful theoretical and practical lens for analyzing and understanding such critical and complex ecological and socioeconomic issues as global warming and climate change and their implications for sustainability The authors provide policy approaches and strategies to help create a balance among the often competing forces of environmental protection innovation entrepreneurship and social and economic growth that will successfully benefit society and protect democratic values
