Rotman, 2013-01-18 This treatment covers the mechanics of writing proofs the area and circumference of circles and complex numbers and their application to real numbers 1998 edition [Greek Mathematical Thought and the Origin of Algebra](#) Jacob Klein, 1992-01-01 Important study focuses on the revival and assimilation of ancient Greek mathematics in the 13th 16th centuries via Arabic science and the 16th century development of symbolic algebra This brought about the crucial change in the concept of number that made possible modern science in which the symbolic form of a mathematical statement is completely inseparable from its content of physical meaning Includes a translation of Vieta's Introduction to the Analytical Art 1968 edition Bibliography

Differential Topology Andrew H. Wallace, 2012-05-24 Keeping mathematical prerequisites to a minimum this undergraduate level text stimulates students intuitive understanding of topology while avoiding the more difficult subtleties and technicalities Its focus is the method of spherical modifications and the study of critical points of functions on manifolds No previous knowledge of topology is necessary for this text which offers introductory material regarding open and closed sets and continuous maps in the first chapter Succeeding chapters discuss the notions of differentiable manifolds and maps and explore one of the central topics of differential topology the theory of critical points of functions on a differentiable manifold Additional topics include an investigation of level manifolds corresponding to a given function and the concept of spherical modifications The text concludes with applications of previously discussed material to the classification problem of surfaces and guidance along with suggestions for further reading and study
