Ancient Middle East Culture:

The Bible, Natural Theology and Natural Law: Conflict Or Compromise? Robert A. Morey, 2010-05 Dr Robert Morey's study of natural law and natural theology raises important questions that every Bible believer will want answered. His careful study and explanation of various Bible passages will yield a useful orientation to the classic arguments furnished us by the Reformers and their faithful heirs. Dr Nelson Kloosterman: The present volume presents a devastating critique of natural theology and natural law. Its argument is solidly biblical and its accumulation of biblical data is overwhelming. I hope that God prospers it so that many will read it and take heed. Dr John Frame: A. W. Tozer said the most important thing about any person is what comes into their mind when they think of the word God. If you digest Dr Morey's book you will think of God as the glorious One depicted in Holy Scripture. John G. Reisinger: I appreciate Dr Morey's emphasis on making the Bible alone the theoretical basis for science and the arts. All throughout the book he consistently points to the Scriptures as the basis for sustaining everything else. Dr Simon Kistemaker.

The Story of Beginnings H. Mark Abbott, 2013-09-25 In the Bible's introduction are embedded foundational perspectives on who God is and who humans are and what we should be doing that are developed throughout the book. Genesis 1-3 is the story of beginnings depicting who the Creator God is, what this God intended for the creation especially for the human creation, how humans messed up, and at least a hint of what God is doing about this. Like Jesus, the Apostle Paul, and early church leaders, when we want to know what God intended, we listen to the Bible's introduction. The Story of Beginnings deals with such questions as: What is the Image of God? Who were Adam and Eve? What does blessing the Sabbath mean? and How shall we understand the Fall and its implications today.

Language, Memory, and Identity in the Middle East Franck Salameh, 2010-04-12 Since the West's very early flirtations with the modern Near East and especially in the past 100 years of East-West relations, there has been considerable difficulty in understanding and defining the Middle East: the Arab world, pan-Arabism, Arab nationalism, and Middle Eastern identities in general. The Western impulse of conflating national identity with language, state, and ethnicity often subsuming Arabic language into Arab ethnicity has contributed to this misunderstanding and misreading of the region. For while the Middle East can be accurately referred to by way of the generic Arab world label, the appellation itself is a misleading oversimplification that conceals an inherent diversity and multiplicity of Middle Eastern cultures, ethnicities, languages, and nationalities. And while there is certainly a dominant Arab ethnos, there are also significant numbers of Middle Eastern peoples and nationalities with historical memories and ethno-cultural bonds that challenge the dominant Arabist paradigm. Language, Memory, and Identity in the Middle East proposes a new reading of modern Middle Eastern history and suggests alternate solutions to the region's problems. The book is an attempt to rehabilitate and bring back to the fore of Middle East Studies the issue of language as a

key factor in shaping and misshaping the region with the hope of rediscovering a broader more honest and less ideologically tainted discussion on the Middle East Language Memory and Identity in the Middle East has a special focus on Lebanon a Christian homeland because Lebanon has traditionally acted as the region's template for change and a barometer gauging its problems and charting its progress **The Middle East & South Asia Folklore Bulletin**, 2000 **Finding Antiquity, Making the Modern Middle East** Guillemette Crouzet, Eva Miller, 2025-06-12 This volume presents innovative studies of how the emerging disciplines of archaeology and ancient history shaped the modern Middle East and how they were in turn shaped by competing visions and agendas of empires and new nations The Middle East was a region constructed through its putatively unique relationship to the whole world's past and its special relevance for the destiny of empires and nations Over the course of the nineteenth and early twentieth centuries European empires fought for influence and control over this cradle of civilization empire and monuments and local powers and people in the Middle East worked with and against these historical and heritage frameworks in their own quests for self-determination In this volume contributors from the fields of history archaeology and heritage explore how historical consciousness about the Middle East was contested in the nineteenth and early twentieth century through excavation and interpretation of the past Chapters span West Asia and North Africa covering Turkey Iraq Iran Syria Lebanon Israel Palestine Egypt and Tunisia and the imperial history of Britain France Germany and the Ottoman Empire The result is an original contribution to our understanding of the origins and influence of Middle Eastern archaeology which resonates today in contemporary discussions on heritage discourses and practices

Hoffmann-Salz,2021 The Middle East has always been and still is today a place of cultural interaction for local communities and larger political entities This interaction requires constant negotiations between the various groups and it is here that the Middle Ground concept originally developed by Richard White can offer a valuable framework for our analysis The papers of this volume show the possibilities of using the Middle Ground concept in analyzing the ancient Middle East but also allow the development of other ideas on cultural contact in a changing world Conquest and expansion of dominant groups like the Hellenistic monarchies or the Roman Empire created a need for local partners who were able to use their position to negotiate a communicable framework even if this process involved a risk of frequent misunderstandings At the same time native communities utilized contacts to other and often dominant groups to express their identities and formulate their interests in this newly developed mutually communicable framework The ancient Middle East can thus be shown to be a Middle Ground a place where actors from different cultures negotiated a common understanding Archaeological Survey and Settlement Pattern Models in Central Illinois Donna C.
