Proceedings for the 8th European Conference on Innovation and Entrepreneurship Stijn Kelchtermans, Filip de Beule,2013

Contemporary Perspectives in Philosophy and Methodology of Science Wenceslao J. González,2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological

trends of the twentieth century is in many ways still in place

Protein Phosphorylation in Health and Disease Allegra Via, Andreas Zanzoni, 2016-08-11 Protein phosphorylation is one of the most abundant reversible post translational modifications in eukaryotes It is involved in virtually all cellular processes by regulating protein function localization and stability and by mediating protein protein interactions Furthermore aberrant protein phosphorylation is implicated in the onset and progression of human diseases such as cancer and neurodegenerative disorders In the last years tens of thousands of in vivo phosphorylation events have been identified by large scale quantitative phospho proteomics experiment suggesting that a large fraction of the proteome might be regulated by phosphorylation This data explosion is increasingly enabling the development of computational approaches often combined with experimental validation aiming at prioritizing phosphosites and assessing their functional relevance Some computational approaches also address the inference of specificity determinants of protein kinases phosphatases and the identification of phosphoresidue recognition domains In this context several challenging issues are still open regarding phosphorylation including a better understanding of the interplay between phosphorylation and allosteric regulation agents and mechanisms disrupting or promoting abnormal phosphorylation in diseases the identification and modulation of novel phosphorylation inhibitors and so forth Furthermore the determinants of kinase and phosphatase recognition and binding specificity are still unknown in several cases as well as the impact of disease mutations on phosphorylation mediated signaling The articles included in this Research Topic illustrate the very diverse aspects of phosphorylation ranging from structural changes induced by phosphorylation to the peculiarities of phosphosite evolution Some also provide a glimpse into the huge complexity of phosphorylation networks and pathways in health and disease and underscore that a deeper knowledge of such processes is essential to identify disease biomarkers on one hand and design more effective therapeutic strategies on the other

Problematising Local Indigenous Community Research Allucia L. Shokane, Kelly J. Gross, 2021-12-30 This book deliberates on developments related to Knowledge Pathing Multi Inter and Trans Disciplining in Social Sciences The book explores the value of this vexed concept in advancing the course for multi inter and trans disciplinary perspectives methodologies theories and epistemologies of knowledge pathing The discourse on knowledge pathing remains critical in advancing debates and dialogues in the humanities and social sciences spaces of research and studies This book makes a significant contribution to the scholarly understanding of indigenous knowledge research by focusing on problematising local indigenous community research from Afro sensed perspectives The field of indigenous knowledge research and higher education in Africa is complex Yet across the continent higher education has been the sector to least embrace Indigenous Knowledge Systems IKS or regard indigenous science as a legitimate source of inspiration for the development of youth and local communities Higher education institutions and local indigenous communities should thus generate knowledge and power through research On the other hand higher education researchers should use their research processes and skills for cross beneficiation when engaging local indigenous communities This book

embodies the current discourse on decolonisation and the use of indigenous knowledge in research and is intended for research specialists in the field of indigenous knowledge systems Collected Papers.
