Pre-Service Teacher Education and Induction in Southwest China Ju Huang, 2018-09-12 This book is a narrative inquiry that focuses on four participating Chinese teacher candidates cross cultural learning in Canada and stories of induction in Southwest China Through the lens of three dimensional inquiry space and reciprocal learning in teacher education the author explores the influence of cross cultural experiences on the dissonance of pedagogies teacher student relationships socialization and beliefs about teaching and learning that interweave global and national curriculum boundaries The chapters provide insight into how Chinese beginning teachers struggle to voice and to socialize among a cacophony of past practices lived experiences and cross cultural experiences *Rethinking Value-Added Models in Education* Audrey

Amrein-Beardsley, 2014-04-24 Since passage of the No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways
