Entertaining Judgment Greg Garrett,2015 Nowadays references to the afterlife angels strumming harps demons brandishing pitchforks God enthroned on heavenly clouds are more often encountered in New Yorker cartoons than in serious Christian theological reflection Speculation about death and its sequel seems to embarrass many theologians however as Greg Garrett shows in *Entertaining Judgment* popular culture in the U S has found rich ground for creative expression in the search for answers to the question What lies in store for us after we die The lyrics of Madonna Los Lonely Boys and Sean Combs the plotlines of TV s *Lost* *South Park* and *The Walking Dead* the implied theology in films such as *The Dark Knight* *Ghost and Field of Dreams* the heavenly half light of Thomas Kinkade s popular paintings the ghosts shades and after life way stations in *Harry Potter* and the characters situations and locations in the *Hunger Games* saga all speak to our hopes and fears about what comes next In a rich survey of literature and popular media Garrett compares cultural accounts of death and the afterlife with those found in scripture Denizens of the imagined afterlife whether in heaven hell on earth or in purgatory speak to what awaits us at once shaping and reflecting our deeply held if often somewhat nebulous beliefs They show us what rewards and punishments we might expect offer us divine assistance and even diabolically attack us Ultimately we are drawn to these stories of heaven hell and purgatory and to stories about death and the undead not only because they entertain us but because they help us to create meaning and to learn about ourselves our world and perhaps the next world Garrett s deft analysis sheds new light on what popular culture can tell us about the startlingly sharp divide between what modern people profess to believe and what they truly hope and expect to find after death and how they use those stories to help them understand this life

The Rise of the Human Digital Brain Beatriz Pacheco, 2018-08-01 Cover Design By Rebecca Gibson Jones It is estimated that up to sixty five percent of children entering grade school this year will end up working in careers that have yet to be created This is a result in part of the rapid advances in technology that have occurred since Apple introduced the iPhone just ten years ago This technology is not only impacting the way that we learn or the jobs that we will hold in the future but it is literally changing the way that we think As modern technologies are introduced during formative periods of brain development they are having an impact on traditionally linear patterns of thought Today's youth no longer process information in the same linear fashion as past generations This is creating confusion in educational settings that are specifically designed to meet the needs of linear thinkers Administrators educators and parents must learn to better understand these changes in order to create models that will be viable for 21st century learners We must work together to create systems that will both support and encourage children who literally think differently than those who teach them The Rise of the Human Digital Brain How Multidirectional Thinking is Changing the Way We Learn contains information about the history of education the changes in the systems of education over the years and the impact of technology on learning for 21st century students It also contains the results of a unique study regarding the impact of iPad
