Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson,Frans Prins,2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which

circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions Teacher-Made Assessments Christopher Gareis, Leslie W. Grant, 2015-03-24 Assessment is not only a measure of student learning but a means to student learning This bestselling book guides you in constructing and using your own classroom assessments including tests quizzes essays and rubrics to improve student achievement You will learn how to weave together curriculum instruction and learning to make assessment a more natural useful part of teaching Find out how to ensure your assessments are fair reliable and valid construct assessments that meet the level of cognitive demand expected of students create select response items and understand technology enhanced items that are increasingly being used on assessments use constructed response items and develop scoring criteria such as rubrics and analyze student results on assessments and use feedback more effectively This second edition features updated examples that reflect the Common Core State Standards as well as other content standards and new useful samples of teacher friendly techniques for strengthening classroom assessment practices No matter what grade level or subject area you teach this practical book will become your go to resource for designing effective assessments
