The Development of the Concept of SMELL in American English Daniela Pettersson-Traba, 2022-10-24 The last decades have witnessed a renewed interest in near synonymy In particular recent distributional corpus based approaches used for semantic analysis have successfully uncovered subtle distinctions in meaning between near synonyms However most studies have dealt with the semantic structure of sets of near synonyms from a synchronic perspective while their diachronic evolution generally has been neglected Against this backdrop the aim of this book is to examine five adjectival near synonyms in the history of American English from the understudied semantic domain of SMELL fragrant perfumed scented sweet scented and sweet smelling Their distribution is analyzed across a wide range of contexts including semantic morphosyntactic and stylistic ones since distributional patterns of this type serve as a proxy for semantic dissimilarity The data is submitted to various univariate and multivariate statistical techniques making it possible to uncover fine grained dissimilarities among the near synonyms as well as possible changes in their prototypical structures The book sheds valuable light on the diachronic development of lexical near synonyms a dimension that has up to now been relatively disregarded
