This volume introduces a new applied learning approach that focuses on the real world context required to apply theory and skills from the text to various case studies throughout the chapters. All chapters begin with a scenario appropriate to the content and contextual exercises are incorporated throughout the chapter. National curriculum competencies covered in each chapter are listed in the chapter opener to help students focus on what is required for certification and familiarize them with the official language of the curricula. Charting examples in all procedures cover proper documentation in the patient record to ensure accurate charting, extremely important to communicating the proper information to a record user and legally protecting the practice.
