Note:

1. In a neutral atom, the number of Protons and Electrons are **equal** and is the same number as the atomic number for that element.
2. Protons can never be lost or gained by an atom, which is why they are used to identify the atom.
3. Electrons can be lost or gained. When this happens atoms will get a charge because protons and electrons are no longer equal. Positive ions are called **Cations**, negative ions are called **Anions**.

1. What is an ion?
2. When an atom is an ion, where is the charge written?
