Ancient Middle East Maps:

Atlas of the Ancient Near East Trevor Bryce, Jessie Birkett-Rees, 2016-04-20 This atlas provides students and scholars with a broad range of information on the development of the Ancient Near East from prehistoric times through the beginning of written records in the Near East c 3000 BC to the late Roman Empire and the rise of Islam The geographical coverage of the Atlas extends from the Aegean coast of Anatolia in the west through Iran and Afghanistan to the east and from the Black and Caspian Seas in the north to Arabia and the Persian Gulf and Indian Ocean in the south The Atlas of the Ancient Near East includes a wide ranging overview of the civilizations and kingdoms discussed written in a lively and engaging style which considers not only political and military issues but also introduces the reader to social and cultural topics such as trade religion how people were educated and entertained and much more With a comprehensive series of detailed maps supported by the authors commentary and illustrations of major sites and key artifacts this title is an invaluable resource for students who wish to understand the fascinating cultures of the Ancient Near East **Ancient Perspectives** Richard J. A.

Talbert, 2014-02-14 **Ancient Perspectives** encompasses a vast arc of space and time Western Asia to North Africa and Europe from the third millennium BCE to the fifth century CE to explore mapmaking and worldviews in the ancient civilizations of Mesopotamia Egypt Greece and Rome In each society maps served as critical economic political and personal tools but there was little consistency in how and why they were made Much like today maps in antiquity meant very different things to different people **Ancient Perspectives** presents an ambitious fresh overview of cartography and its uses The seven chapters range from broad based analyses of mapping in Mesopotamia and Egypt to a close focus on Ptolemy's ideas for drawing a world map based on the theories of his Greek predecessors at Alexandria The remarkable accuracy of Mesopotamian city plans is revealed as is the creation of maps by Romans to support the proud claim that their emperor's rule was global in its reach By probing the instruments and techniques of both Greek and Roman surveyors one chapter seeks to uncover how their extraordinary planning of roads aqueducts and tunnels was achieved Even though none of these civilizations devised the means to measure time or distance with precision they still conceptualized their surroundings natural and man made near and far and felt the urge to record them by inventive means that this absorbing volume reinterprets and compares

Possessed by the Right Hand Bernard K. Freamon, 2019-05-20 In *Possessed by the Right Hand* the first comprehensive legal history of slavery in Islam ever offered to readers Bernard K. Freamon, an African American Muslim law professor, provides a penetrating analysis of the problems of slavery and slave trading in Islamic history. After examining the issues from pre-Islamic times through to the nineteenth century, Professor Freamon considers the impact of Western abolitionism, arguing that such efforts have been a failure, with the notion of abolition becoming nothing more than a cruel illusion. He closes this ground-breaking account with an examination of the slaving ideologies and actions of ISIS and Boko Haram, asserting that Muslims now have an important and urgent responsibility to achieve true abolition under the aegis of Islamic law. See Bernard Freamon live at Rutgers Law School, October 8, 2019. Listen to *Possessed by the Right Hand*. An Interview with Prof. Bernard Freamon from Network ReOrient on Anchor.

The True History of Planet Earth and its Aliens Raymond Lamarr, 2022-05-23 In this book, the author has looked at and studied during his lifetime the many theories and beliefs of the creation of earth, our solar system, the universe, and everything in it, including all the organics, plants, animals, humans, extraterrestrials, spiritual, and other realms of existence. Included in this book are the studies of extraterrestrials that have been listed in five different categories and their influence on earth throughout history from the ancient past to the present day. The author speaks at length on the prevailing beliefs and theories of evolution, religious, and ancient histories, and the ancient astronaut theorists. Included is a study of the laws of creation and life, which is truth and reality throughout the entire universe. He also speaks of the beliefs of other sects in the world today and throughout all of world history. He tells of the four different tragedies that happened in the world and our solar system in the last six thousand years, the who, how, why, and when of them. He lists the interpretations of history and prophecies that came to light and were reported in the 1950s and 1960s that seem to have been pretty much forgotten. He brings to light the misinterpretations and mistranslations of biblical history and the great many histories of the world, including the many histories of the Americas.

Exploring the Story of Israel Yvette Nelson, 2000-09-16 *Discovering* is a comprehensive parish religion curriculum for adolescents, grades six to eight. Each section comprises a student booklet and an accompanying teaching guide, which is bound with a student booklet.

Unveiling the Messiah in the Dead Sea Scrolls Margaret S. King, 2012-01-20 The author is convinced that the early Byzantine Church deliberately cut out sections from an historic text to conceal the truth about the crucifixion of a man they were promoting as their Messiah. She solves the mystery by reconstructing the deleted sections, King pieces together what happened in Jerusalem during the trial and attempted crucifixion of the real Messiah, and shows that the key passages that were tampered with are actually the missing link that connects the Dead Sea Scrolls to the New Testament Gospels. Using those passages and the history of the period, she identifies the figures mentioned in the Dead Sea Scrolls.
