Many Texts, Many Voices Penny Silvers, Mary C. Shorey, 2012

On any given day a visitor to Mary Shorey s classroom will find elementary students using a variety of learning tools from books to wikis and blogs to pose critical questions about the world and take action to make a difference in the lives of others Whether sponsoring a book drive for victims of Hurricane Katrina using a multimedia presentation to persuade the principal

to adopt their recycling plan or challenging a senior citizen's eviction it's all in a day's work for Mary's students. Her young learners are becoming conscious consumers, creative thinkers, and effective communicators even while fulfilling the mandated curriculum and Common Core Standards. As Shorey and coauthor Penny Silvers write in *Many Texts, Many Voices*, Critical literacy requires that the reader/consumer examine multiple perspectives and ask: Whose interests are being served and Whose voice is heard or silenced? Rather than an addition to a lesson or curriculum, critical literacy is a way of thinking, communicating, analyzing, and living a literate life. Critical literacy also implies the possibility of taking some kind of social action in order to support a belief, make a difference, or simply help during a time of need. Always mindful of what is appropriate for young children, Shorey and Silvers continually search for opportunities to embed critical literacy and inquiry in the everyday lives of primary students. Through a rich array of rubrics, sample lessons, text sets, unit designs, and professional resources, Silvers and Shorey share their reflective practices so that all teachers can use print, visual, and digital tools to transform student learning.

Using Technology with Classroom Instruction That Works Howard Pitler, Elizabeth R. Hubbell, Matt Kuhn, 2012-08-02 Technology is ubiquitous and its potential to transform learning is immense. The first edition of *Using Technology with Classroom Instruction That Works* answered some vital questions about 21st-century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning framework featured in the new edition of *Classroom Instruction That Works*, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: Setting objectives and providing feedback; Reinforcing effort and providing recognition; Cooperative learning; Cues, questions, and advance organizers; Nonlinguistic representations; Summarizing and note-taking; Assigning homework and providing practice; Identifying similarities and differences; Generating and testing hypotheses. Each strategy-focused chapter features examples across grade levels and subject areas, and is drawn from real-life lesson plans and projects of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and most of all, more effective.
