Disruption in Financial Reporting Krish Bhaskar, John Flower, 2021-01-21 Since the global financial crisis of 2007 8 new laws and regulations have been introduced with the aim of improving the transparency in financial reporting Despite the dramatically increased flow of information to shareholders and the public this information flow has not always been meaningful or useful Often it seems that it is not possible to see the wood for the trees Financial scandals continue as Wirecard NMC Health Patisserie Valerie going back to Carillion and many more demonstrate Financial and corporate reporting have never been so fraught with difficulties as companies fail to give guidance about the future in an increasingly uncertain world aided and abetted by the COVID 19 pandemic This concise book argues that the changes have simply masked an increase in the use of corporate PR impression management bullet points glossy images and other simulacra which allow poor performance to be masked by misleading information presented in glib boilerplate texts images and tables The tone of the narrative sections in annual reports is often misleading Drawing on extensive research and interviews with insiders and experts this book charts what has gone wrong with financial reporting and offers a range of solutions to improve information to both investors and the public This provides a framework for a new era of forward looking corporate reporting and guidance based on often conflicting multiple corporate goals The book also examines and contrasts the latest thinking by the regulatory authorities Providing a compelling exploration of the industry's failings and present difficulties and the impact of future disruption this timely thought provoking book will be of great interest to students researchers and professionals as well as policy makers in accounting financial reporting corporate reporting financial statement analysis and governance
