

First-person narrator personifies the poem and makes it seem more real.

London
This sounds purposeless - could reflect how he feels powerless to change what's happening.

I wander thro' each charter'd street,

suggests the whole city is affected, not just one area.

Near where the charter'd Thames does flow,

even powerful, natural features like the River Thames are under human control and affected by the city's problems.

And mark in every face I meet

Marks of weakness, marks of woe.

The speaker hears various distressing noises - makes this seem like a vivid, hellish experience

In every cry of every Man,

In every Infants cry of fear,

In every voice: in every ban,

The mind-forg'd manacles I hear

How the Chimney-sweepers cry

Every blackning Church appalls,

And the hapless Soldiers sigh

Runs in blood down Palace walls

Chimney sweepers usually young boys - emotive image of child labour.

Might be a reference to the French Revolution - sounds like he thinks ordinary people suffer while those in the Palace are protected behind walls.

But most thro' midnight streets I hear

How the youthful Harlots curse

Blasts the new-born Infants tear

And blights with plagues the Marriage hearse

Hears the prostitutes swearing but he might also mean they are a curse on London.

Ozymorion - links the happy image of marriage with death. suggests everything has been destroyed - used to show how everything is affected and nothing pure or innocent remains.

Powerful language of illness and disease. Destruction is implied by 'blights' and 'plagues' hints at something that's uncontrollable and destined to affect lots of people.

Repetition emphasises feeling of bleakness - despair affects everyone and there's no relief from it.

People are trapped in every way, even by thoughts and attitudes

Seems to be angry at all forms of power - describing the church as blackening could suggest that it is corrupt or tarnished by its failure to look after people. Grim visual image of the ugliness caused by the industrial revolution.

Contrast between innocence of youth and savagery of prostitution

The innocence of newborn babies is not immediately - society damages it's members

Annotation Of A Poem Template:

Annotation in Eighteenth-Century Poetry Michael Edson, 2017-10-18 Recent years have witnessed a growing fascination with the printed annotations accompanying eighteenth century texts Previous studies of annotation have revealed the margins as dynamic textual spaces both shaping and shaped by diverse aesthetic historical and political sensibilities Yet previous studies have also been restricted to notes by or for canonical figures they have neglected annotation's relation to developments in reading audiences and the book trade and they have overlooked the interaction even tension between prose notes and poetry a tension reflecting eighteenth century views of poetry as aesthetically superior to prose *Annotation in Eighteenth Century Poetry* addresses these oversights through a substantial introduction and eleven essays analyzing the printed endnotes and footnotes accompanying poems written or annotated between 1700 and 1830 Drawing on methods and critical developments in book history and print culture studies this collection explores the functions that annotation performed on and through the printed page By analyzing the annotation specific to poetry these essays clarify the functions of notes among the other paratexts including illustrations by which scholars have mapped poetry's relation to the expanding book trade and the class specific production of different formats Because the reading and writing of poetry boasted social and pedagogical functions that predate the rise of the note as a print technology studying the relation of notes to poetry also reveals how the evolving layout of the eighteenth century book wrought significant changes not only on reading practices and reception but on the techniques that booksellers used to make new poems steady sellers and antiquarian discoveries legible to new readers Above all analyzing notes in poetry volumes contributes to larger inquiries into canon formation and the rise of literary studies as a discipline in the eighteenth century

Expanding Approaches to Thematic Analysis Jennifer R. Wolgemuth, Kelly W. Guyotte, Stephanie Anne Shelton, 2024-08-01 Expanding Approaches to Thematic Analysis Creative Engagements with Qualitative Data springboards readers into a world where generating themes from qualitative data is a creative experimental and wondrous process While no one ever said it had to be thematic analysis is invariably described as a step by step process that involves coding Yet qualitative data analysis is more than a technical procedure it invokes imagination and inspiration intuitional engagements that are as vital to the data analysis process as they are difficult to describe This edited book begins with two premises 1 there is more than one way to theme data and 2 qualitative researchers do not have to code to get to themes Each chapter introduces readers to a different approach to thematic analysis explores that approach s theoretical and disciplinary roots and illustrates how that approach can be used to generate themes Approaches include annotating memoing storying writing composing poems artmaking meditating and more expanding conceptualizations of what themes and thematic analysis can be The book also includes methodologies in action helpful examples of creative theming from doctoral students and early career scholars This book is as much a provocation for engaging thematic analysis beyond without in addition to coding as it is a resource for anyone interested in the rationale justification and examples for doing so As such it is a source of inspiration for any qualitative student researcher and scholar who wishes to expand their repertoire of approaches to thematic analysis

Annotations in Scholarly Editions and Research Julia Nantke, Frederik Schlupkothen, 2020-10-26 The term annotation is associated in the Humanities and Technical Sciences with different concepts that vary in coverage application and direction but which also have instructive parallels This publication mirrors the increasing cooperation that has been taking place between the two disciplines within the scope of the

digitalization of the Humanities It presents the results of an international conference on the concept of annotation that took place at the University of Wuppertal in February 2019 This publication reflects on different practices and associated concepts of annotation in an interdisciplinary perspective puts them in relation to each other and attempts to systematize their commonalities and divergences The following dynamic visualizations allow an interactive navigation within the volume based on keywords Wordcloud Matrix Edge Bundling

Gabriel Harvey and the History of Reading Anthony Grafton, Nicholas Popper, William H. Sherman, 2024-01-08 Few articles in the humanities have had the impact of Lisa Jardine and Anthony Grafton's seminal *Studied for Action* 1990 a study of the reading practices of Elizabethan polymath and prolific annotator Gabriel Harvey Their excavation of the setting methods and ambitions of Harvey's encounters with his books ignited the *History of Reading* an interdisciplinary field which quickly became one of the most exciting corners of the scholarly cosmos A generation inspired by the model of Harvey fanned out across the world's libraries and archives seeking to reveal the many creative unexpected and curious ways that individuals throughout history responded to texts and how these interpretations in turn illuminate past worlds Three decades on Harvey's example and Jardine's work remain central to cutting edge scholarship in the *History of Reading* By uniting *Studied for Action* with published and unpublished studies on Harvey by Jardine Grafton and the scholars they have influenced this collection provides a unique lens on the place of marginalia in textual intellectual and cultural history The chapters capture subsequent work on Harvey and map the fields opened by Jardine and Grafton's original article collectively offering a posthumous tribute to Lisa Jardine and an authoritative overview of the *History of Reading*

Quantitative Historical Linguistics Gard B. Jensen, Barbara McGillivray, 2017 This book is an innovative guide to quantitative corpus based research in historical and diachronic linguistics Gard B Jensen and Barbara McGillivray argue that although historical linguistics has been successful in using the comparative method the field lags behind other branches of linguistics with respect to adopting quantitative methods Here they provide a theoretically agnostic description of a new framework for quantitatively assessing models and hypotheses in historical linguistics based on corpus data and using case studies to illustrate how this framework can answer research questions in historical linguistics The authors offer an in depth explanation and discussion of the benefits of working with quantitative methods corpus data and corpus annotation and the advantages of open and reproducible research The book will be a valuable resource for graduate students and researchers in historical linguistics as well as for all those working with linguistic corpora

The Penn Commentary on Piers Plowman, Volume 2 Ralph Hanna, 2017-03-15 The first full commentary on *Piers Plowman* since the late nineteenth century the *Penn Commentary* places the allegorical dream vision of *Piers Plowman* within the literary historical social and intellectual contexts of late medieval England and within the long history of critical interpretation of the poem assessing past scholarship while offering original materials and insights throughout The authors line by line section by section and passus by passus commentary on all three versions of the poem

and on the stages of its multiple revisions reveals new aspects of the work's meaning while assessing and summarizing a complex and often divisive scholarly tradition. The volumes offer an up-to-date original and open-ended guide to a poem whose engagement with its social world is unrivaled in medieval English literature and whose literary religious and intellectual accomplishments are uniquely powerful. The Penn Commentary is designed to be equally useful to readers of the A, B, or C texts of the poem. It is geared to readers eager to have detailed experience of *Piers Plowman* and other medieval literature possessing some basic knowledge of Middle English language and literature and interested in pondering further the particularly difficult relationships to both that this poem possesses. Others with interest in poetry of all periods will find the extended and detailed commentary useful precisely because it does not seek to avoid the poem's challenges but seeks instead to provoke thought about its intricacy and poetic achievements. Volume 2 by Ralph Hanna deliberately addresses the question of the poem's perceived difficulty by indicating the legitimate areas of unresolved dilemmas while offering often original explanations of a variety of textual loci. Perhaps more important, his commentary indicates what has not always appeared clear in past approaches: that the poem only means in its totality and within some critical framework and that its annotation needs always to be guided by a sense of Langland's developing arguments.

Computational Stylistics in Poetry, Prose, and Drama Anne-Sophie Bories, Petr Plecháč, Pablo Ruiz Fabo, 2022-12-19. This volume responds to the current interest in computational and statistical methods to describe and analyse metre, style and poeticity, particularly insofar as they can open up new research perspectives in literature linguistics and literary history. The contributions are representative of the diversity of approaches, methods and goals of a thriving research community. Although most papers focus on written poetry, including computer-generated poetry, the volume also features analyses of spoken poetry, narrative, prose and drama. The contributions employ a variety of methods and techniques ranging from motif analysis, network analysis, machine learning and Natural Language Processing. The volume pays particular attention to annotation, one of the most basic practices in computational stylistics. This contribution to the growing dynamic field of digital literary studies will be useful to both students and scholars looking for an overview of current trends, relevant methods and possible results at a crucial moment in the development of novel approaches when one needs to keep in mind the qualitative hermeneutical benefit made possible by such quantitative efforts.
