Chaos in Chemistry and Biochemistry Richard J. Field, L. szlç Györgyi, 1993 True deterministic chaos is characterized by unpredictable apparently random motion in a dynamical system completely described by a deterministic dynamic law usually a nonlinear differential equation with no stochastic component The inability to predict future behavior of a chaotic system occurs because trajectories evolving from arbitrarily close initial conditions diverge Chaos is universal as it may arise in any system governed

by one of a class of quite common suitable nonlinear dynamic laws This book discusses both the experimental observation and theoretical interpretation of chaos in chemical and biochemical systems Examples are drawn from the Belousov Zhabotinsky reaction surface reactions electrochemical reactions enzyme reactions and periodically perturbed oscillating systems The Cumulative Book Index ,1976 A world list of books in the English language *The Software Encyclopedia* 2000 Bowker Editorial Staff,2000-05 *CRREL Technical Publications* Cold Regions Research and Engineering Laboratory (U.S.),1981 **The MX Missile System** United States.
