Contemporary Europe seems to be divided between progressive cosmopolitans sympathetic to the European Union and the ideals of the Enlightenment and counter enlightened conservative nationalists extolling the virtues of homelands threatened by globalised elites and mass migration This study seeks to uncover the roots of historically informed ideas of Europe while at the same time underlining the fundamental differences between the writings of the older counter revolutionary Europeanists and their self appointed successors and detractors in the twenty first century In the decades around 1800 the era of the French Revolution counter revolutionary authors from all over Europe defended European civilisation against the onslaught of nationalist revolutionaries bent on the destruction of the existing order or so they believed In opposition to the new revolutionary world of universal and abstract principles the counter revolutionary publicists proclaimed the concept of a gradually developing European society and political order founded on a set of historical and ultimately divine institutions that had guaranteed Europe s unique freedom moderation diversity and progress since the fall of the Roman Empire These counter revolutionary Europeanists drew on the cosmopolitan Enlightenment and simultaneously criticized its alleged revolutionary legacy Throughout the nineteenth and twentieth centuries these ideas of European history and civilisation were rediscovered and adapted to new political contexts shaping in manifold ways our contested idea of European history and memory until today **World History: Connections to Today** Elisabeth Gaynor Ellis, Pearson/Prentice Hall, 2003-12

Conservation Movement Miles Glendinning, 2013 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely **Improvement and Enlightenment**
