Understanding the ebb and flow of materials on the earth s surface is vital to comprehending environmental change We need
to differentiate between those that represent a progression of natural events from those that might be human induced The
latter can be managed by changing policies the former probably cannot This volume presents what researchers know and do
not know about the base or natural level of surficial fluxes and their dynamics Leading experts in the field offer a historical
perspective on geofluxes and discuss the cycles of materials on the earth s surface from weathering processes to the
movement of material through the river system and oceans to their deposition The committee sets research directions in five
areas shallow water studies mapping rates of change sample dating and most critical understanding whether human
influence can exceed the natural variability in geoflux processes This volume will be important reading for geophysical
