DT175A

In 1974, the DT175A is a completely new kind of dual-sport. Many of the ideas learned in Yamaha's highly successful motorcycle design have been applied to make it much more versatile than ever before. The new, double-loop, motorcycle-type frame carries the engine lower for better stability. And the unusual 180-degree of

the frame, coupled with a softer rear swing arm and a new base design, makes the DT175A both and more like a standard motorcycle. The carburetor and piston gear timing have been further refined this year for more lasting power at low rpm's. This is an engine which stands for the remarkable 100,000

mile per hour made possible by Torque Injection. From the new high-mounted polyurethane front fender to the new, forced streamer, the DT175A is a better dual bike than ever. And still one of the toughest lightweight street bikes around.
