The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions and answer combinations are to be used both by teachers to select questions for their next examinations and by students when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition, dietetics, health sciences, and students taking an anatomy and physiology course as an elective.
