Reproduction in Mammals Virginia Hayssen, Teri J. Orr, 2017-10-27 Newborn mammals can weigh as little as a dime or as much as a motorcycle Some receive milk for only a few days whereas others nurse for years Humans typically have only one baby at a time following nine months of pregnancy but other mammals have 20 or more young after only a few weeks in utero What causes this incredible reproductive diversity Reproduction in Mammals is a fascinating examination of the diverse reproductive strategies of a broad spectrum of mammals and the ways in which natural selection has influenced that diversity While accounts of reproduction in individual taxa abound this unique book's comprehensive coverage gathers stories from many taxa into a single cohesive perspective that centers on the reproductive lives of females The authors shed light on intriguing questions such as Do bigger moms have bigger babies Do primates have longer pregnancies than other groups Do aquatic animals have particular patterns Do carnivores like lions often produce larger litters than prey species The book opens with the authors definition of what constitutes a female perspective and an examination of the evolution of reproduction in mammals It then outlines the

individual female her genetics anatomy and physiology From this nuanced basis the text progresses to mirror the female reproductive cycle and includes her interactions with males and offspring The final section contextualizes the reproductive cycle within the rest of the world both abiotic and biotic environments To close the authors include dedicated chapters on human concerns conservation and women as mammals Readers will come away from this thought provoking book with an understanding not only of how reproduction fits into the lives of female mammals but also of how biology has affected the enormously diverse reproductive patterns of the phenotypes we observe today Provided by publisher *Guyton's Textbook of Medical Physiology, 4th South Asia Edition - E-Book* Mario Vaz, Anura Kurpad, Tony Raj, 2024-08-08 Guyton and Hall Textbook of Medical Physiology continues this bestselling title's tradition as the world's favorite physiology textbook presenting complex principles in language that is easy to read and understand The main aim of the Fourth South Asia Edition of Guyton Hall Textbook of Medical Physiology is to meet the needs of undergraduate medical students and faculty in South Asia by aligning the book to modern recommended teaching methods in the subcontinent The South Asia Edition incorporates several features aimed at aiding learning for students while retaining the flow and explanatory approach Implementation of the one chapter one lecture model aligning the text with curriculum objectives to enhance appeal for students and faculty Introduction of easy to read boxes containing clinical information summaries lists and vignettes providing accessible and relevant content Incorporation of updated Learning Objectives and a Glossary of Terms at the beginning of every chapter facilitating focused learning and understanding Addition of new multiple choice questions MCQs for each chapter promoting active learning and assessment opportunities *Theriogenology*, 2025-03-26 This book brings important insights into advances in knowledge related to production companion or wild animals highlighting state of the art technology challenges and perspectives of applying appropriate reproductive management and innovative technologies for animal production reproductive control or the conservation of genotypes of interest It is divided into four major sections reproductive physiology reproductive pathology assisted reproduction and animal breeding The first on reproductive physiology comprises chapters on the autonomous innervation of the male gonad steroidogenesis sperm physiology and ovulation mechanisms The second section on reproductive pathologies highlights review studies on endometritis postpartum anestrus and disorders in sexual development The following section is dedicated to assisted reproduction being focused on biobanking sperm and somatic tissues as well as in vitro embryo production Finally the last section is dedicated to animal breeding presenting chapters concerning this theme for both domestic and wild species
