Anatomy Of A Great Deception Trailer:

The Great Deception Christopher Booker, Richard North, 2021-10-19 Since its publication in 2003 *The Great Deception* has taken on the role of the Eurosceptics bible with the third edition helping to fuel the debate during the 2016 EU Referendum This fourth edition celebrates the moment when the UK breaks away from the European Union having been extensively re edited to incorporate newly available archive material and updated to include the tumultuous events of recent years *The Great Deception* therefore tells for the first time the inside story of the most audacious political project of modern times from its intellectual beginnings in the 1920s when the blueprint for the European Union was first conceived by a British civil servant right up to the point when the UK resumes its path as an independent sovereign nation after 47 years of membership of the European project in its various guises Drawing on a wealth of new evidence and existing sources scarcely an episode of the story does not emerge in startling new light from the real reasons why de Gaulle kept Britain out in the 1960s to the fall of Mrs Thatcher and the build up to the referendum campaign which had its roots in the Maastricht Treaty The book chillingly shows how Britain's politicians were consistently outplayed in a game the rules of which they never understood It ends by evaluating the post referendum negotiations and asking whether this is the end of an episode or just a new beginning Publisher's description

Misleading Movie Trailers Zuri Deepwater, AI, 2025-03-29 *Misleading Movie Trailers* explores the world of deceptive film marketing revealing how trailers often misrepresent a movie's true content tone and genre This practice driven by market pressures and creative liberties can erode audience trust and negatively impact a film's success The book argues that these misleading tactics are a systemic issue within the film industry not just isolated incidents For instance trailers sometimes selectively showcase scenes or use suggestive editing to create a false impression which exploits consumer behavior The book progresses through a structured analysis beginning with a theoretical framework that defines misleading trailers and examines the historical evolution of movie marketing It then presents case studies of specific films and their trailers dissecting instances of misrepresentation and analyzing the marketing strategies employed A key finding is that while crafting an appealing trailer is essential crossing ethical boundaries can lead to negative word of mouth highlighting the importance of advertising ethics Finally the book synthesizes these findings to explore the psychological principles behind deceptive marketing and the role of online communities in influencing audience perception Ultimately *Misleading Movie Trailers* aims to foster transparency in the film industry By analyzing the persuasive techniques used in trailers the book offers insights for filmmakers marketers and consumers encouraging critical thinking and informed decision making It also benefits business management by exploring the effect of misleading ads in general and its effect on future customer relationships

The Land Reform Deception Alexander Charles Laurie, 2016 *The Land Reform Deception* looks at a particularly contentious period in Zimbabwe's recent history from 2000-2008 when the government seized commercial farms using illegal and violent methods against a largely unarmed population of farmers and farm workers

Robert Mugabe's government began the seizures on a small targeted scale in an effort to suppress political opposition groups but they soon escalated into an out of control frenzy targeting all farms in the country. The state claimed that the seizures occurred in response to a public cry for land redistribution and to rectify colonial era injustices and were part of a structured land reallocation program. Yet land was often distributed ad hoc to those with little or no farming experience. As a result agricultural output contracted and inflation and unemployment rose dramatically in what became a social and economic disaster for the country. In *The Land Reform Deception* Charles Laurie asks why the state would target its own agricultural industry using such violent methods and risk such dire consequences. He also seeks to uncover the major actors and their motivations and strategies. Laurie argues that the seizure of the most valuable farms was largely carried out by politically influential individuals for financial and political gain rather than to address historical injustices. In fact he finds that the scale on which the farm invasions were carried out and the violent methods used were never part of a planned government land policy. Indeed Laurie shows that Mugabe initially opposed the seizures knowing that they would wreck the economy only to later support them in order to appease his supporters and retain political power. Incorporating unprecedented empirical evidence gathered from in depth interviews with senior politicians, members of the secretive Central Intelligence Organization, the military and police along with farmers and farm workers who were targeted during the invasions, *The Land Reform Deception* strips away official explanations and delves into the political and economic drivers that triggered the seizure of commercial farms in Zimbabwe. *Cars & Parts*, 1998-07

Coming Attractions Lisa Kernan, 2009-07-21

Movie trailers, those previews of coming attractions before the start of a feature film, are routinely praised and reviled by moviegoers and film critics alike. They give away too much of the movie. They're better than the films. They only show the spectacular parts. They lie. They're the best part of going to the movies. But whether you love them or hate them, trailers always serve their purpose of offering free samples of a film to influence moviegoing decision making. Indeed, with their inclusion on videotapes, DVDs, and on the Internet, trailers are more widely seen and influential now than at any time in their history. Starting from the premise that movie trailers can be considered a film genre, this pioneering book explores the genre's conventions and offers a primer for reading the rhetoric of movie trailers. Lisa Kernan identifies three principal rhetorical strategies that structure trailers: appeals to audience interest in film genres, stories, and/or stars. She also analyzes the trailers for twenty-seven popular Hollywood films from the classical, transitional, and contemporary eras, exploring what the rhetorical appeals within these trailers reveal about Hollywood's changing conceptions of the moviegoing audience. Kernan argues that movie trailers constitute a long-standing hybrid of advertising and cinema and as such are precursors to today's heavily commercialized cultural forms in which art and marketing become increasingly indistinguishable. **Fool's Gold?** L.
