

The criteria for a Section 42 Safeguarding Enquiry under the Care Act 2014:

- The Care Act (Section 42) states that the Local Authority must initiate a safeguarding process for anyone who meets the following three criteria:
 - (a) has needs for care and support (whether or not the authority is meeting any of those needs),
 - (b) is experiencing, or is at risk of, abuse or neglect, and
 - (c) as a result of those needs is unable to protect himself or herself against the abuse or neglect or the risk of it.
- It is really important to consider part (c) carefully, and this is something you may want to discuss in a 'pre-referral consultation'.

Man,2016-07-25 This book aims to find a workable interpretation of the non appropriation principle that is compatible with both the existing international space law framework and the move of the private space industry towards the mining of asteroids and other celestial bodies It does so by analysing the rules on the use of orbits as limited natural resources as a concrete indication of how space resources can be exploited by one user while respecting the non appropriation principle and the interests of other users in space This analysis is complemented by a thorough review of the meaning of property rights in the context of the existing international space law regime This allows the author to distinguish between the lawful exploitation and unlawful appropriation of resources in a manner that could pave the way for a workable asteroid mining regime that takes into account the needs of individual companies and the international community Exclusive use in an inclusive environment frames the legal regime of the exploitation of natural resources in outer space as the most pressing example to date of the tension that arises between the rights of a single spacefaring actor and the interests of the broader international community Though academic in its approach in dealing with one of the most fundamental issues of space law to date the book has very practical ambitions By offering a pragmatic interpretation of the space law principles that are likely to remain the legal foundations of asteroid mining for the foreseeable future Exclusive use in an inclusive environment hopes to inform academics practitioners and policymakers alike in their future attempts at working out a fair equitable and effective management regime for the exploitation of natural resources in outer space *Strangers Within* Francisco

Bethencourt,2024-03-26 The New Christians largely former Jews and Muslims who were forced to convert to Christianity in the 16th and 17th centuries were both a persecuted group as well as an international elite and their story argues Francisco Bethencourt offers a fascinating and indispensable view into the period and the making of a global economy In what is intended to be an authoritative and innovative book the author will recount how the New Christians were a major force in structuring the Atlantic economy and reconstruct their involvement in trading system which ran from the Atlantic to the

Indian Ocean Their hybrid religious allegiances situated as they were primarily between Judaism and Christianity provide a unique case of cosmopolitanism in various parts of the world New Christian business practices forms of organisation and codes of behaviour linked intercontinental networks to local agencies Their ability to resist religious persecution implied alliances at the highest levels of the Catholic Church and the Iberian monarchies This book will provide entirely new perspectives for our understanding of cosmopolitanism religious allegiances political alliances and business history The New Christian trading elite has been studied in a fragmentary way compartmentalised in time and space but it has never been the subject of comprehensive research over the long term from the forced conversion of the Jews in Portugal in 1497 to the abolition of the distinction between New Christians and Old Christians in Portugal in 1773 spanning connections between Europe Africa Asia and the New World *Unmanned Aircraft Systems* Ella Atkins, Anibal Ollero, Antonios

Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state
