Distributed Computing and Internet Technology Goutam Chakraborty, 2005-12-09 The opening ceremony and pre conference tutorials on various related topics were held on December 21. The technical program started on December 22 and continued for three days. The program was arranged in single track so as to enable participants to attend sessions of different tracks. Papers from the DM IT SE and SS tracks were divided into two sessions whereas DC track sessions were held on the first two days of the conference. The program also included two plenary talks. The first talk was delivered by S S Iyengar from Louisiana State University USA. The second talk was delivered by He Jifeng from the International Institute for Software Technology IIST Macau. Prof Iyengar's talk on The Distributed Sensor Networks An Emerging Technology was focused on new ideas about the use of distributed systems for emerging technology while Prof Jifeng's talk on Linking Theories of Concurrency by Retraction dealt with semantics of concurrency. All the conference committee members contributed towards the success of ICDCIT 2005. And it was a pleasant experience for me to work with them. The one name that sticks out is R K Ghosh Steering Committee Chair. He really steered the group with his past experience as Program Chair of ICDCIT 2004.

Precipitation is modeled by a Markov chain exponential model. Solar radiation maximum and minimum temperature are modeled using a multivariate generating model conditioned on the wet or dry state of the day and time period. The model is formulated such that outputs can be used in simulation exercises to test the effect of changing climatic conditions on forest ecosystem processes. *Managing Information Technology Resources in Organizations in the Next Millennium* Information Resources Management Association.
