Restless David J. Gillard, 2022-01-06 Why do many popular songs positively reference God if our culture is widely viewed as secular Why is it a challenge to tell the Christian story when many say they are spiritual and believe in God Why do we draw so much meaning from the popular songs we listen to And might a deeper understanding of popular music culture help us to explore the bigger stories we listen to throughout our lives such as the Christian story Primarily using Zygmunt Bauman's understanding of liquid modernity we look at the social forces that shape Western society and consider why while many are looking for authentic ontologically based stories to understand their life experiences historic providers of the big stories that shape our lives such as the church favor a different epistemological way of telling them How do these different approaches to storytelling affect their reception and what insight might we draw from that Whilst this book is written primarily with those in Christian ministry in mind it will be of interest too to those who use music to explore life experiences through their work who are interested in the social forces that shape society or who simply enjoy listening to popular music *Growth Mindset Lessons* Shirley Clarke, Katherine Muncaster, 2017-02-20 Practising teacher and mindset expert Katherine Muncaster has combined with best selling author Shirley Clarke to produce this must have handbook for anyone looking to embed a growth mindset culture across their primary school With practical strategies lesson plans and extensive examples and realia in full colour this comprehensive resource takes the concept of growth mindset and turns it into a powerful reality A comprehensive and practical scheme of work which will develop a powerful learning culture throughout your school A tangible way to put growth mindset into action which has been developed tested and trialled by Katherine Muncaster Co authored by leading professional development expert Shirley Clarke Supported by easy to access classroom video clips that provide demonstrations of the impact of this approach in lessons

Routledge International Handbook of Music Psychology in Education and the Community Andrea Creech, Donald A. Hodges, Susan Hallam, 2021-05-26 This handbook provides an evidence based account of psychological perspectives on issues in music education and music in the community through the life course exploring our understanding of music learning and participation across contexts The contributors draw on multidisciplinary research from different cultures and contexts in order to set out the implications of music psychology for

music education and music in the community Highlighting the intersecting issues across education and community contexts the book proposes new theories as well as offering important refinements to existing conceptual models Split into six parts it considers the role of music in society as well as for groups and individuals and explores topics such as processing and responding to music pedagogical and musical practices that support or pose challenges to the emotional cognitive social or physical wellbeing of learners and participants in a range of contexts and music in identity or identity in music With the final part on future directions and the implications for professional practice in music education and music in the community the book concludes by exploring how the two sectors might work more closely together within a post COVID 19 world Based on cutting edge research from an international team this is essential reading for anyone interested in music psychology education and community and it will be particularly helpful for undergraduate and graduate students in music psychology music education and community music

First Instruments Nicholas Bannan, 2020 Written for music educators from K 5 onwards First Instruments is a practical guide to teaching musical ideas through the first instruments we develop in early childhood laying the foundation for how the collective creativity the book presents can sustain a lifelong commitment to music making voice and hand gestures Founded on the belief that all children are musical the book gives music teachers the necessary tools to develop students confident understanding of pitch relationships through improvisation and composition Author Nicholas Bannan a veteran pedagogue and children s choir director accomplishes this in a classroom tested system that combines Kodaly hand signs with extended use of physical motions that together result in deeply embodied musical knowledge By participating in the book s many group exercises students develop this knowledge that ultimately paves the way for acquisition and functional working knowledge of harmony that tends to elude most theory students As Bannan shows all effective music teaching needs to involve singing as the portal to a secure and transferable response to pitch First Instruments encourages educators to draw on games tasks and activities in relation to their own curriculum planning Marrying the development of fluent singing abilities with harmonic understandings this approach supports musical creativity that is not dominated by the conventional features of a particular genre or style but instead liberates the musical imagination and enables the exploration of musical styles from throughout history and all over the world

Targeting Neuro-Immuno-Vascular Interactions in the Brain and the Periphery Imola Wilhelm, Istvan A. Krizbai, Mihaela Gherghiceanu, Éva Szőke, Zsuzsanna Helyes, 2023-02-13

Brain Networks for Studying Healthy and Pathological Aging Mechanisms and Intervention Efficacy Christos Frantzidis, Ana B. Vivas, Panagiotis D. Bamidis, 2020-11-18 Previous studies showed that both healthy and pathological aging are associated with changes in brain structure and function of the mature human brain The most prominent anatomical alteration are changes in prefrontal cortex morphology volume loss and reduced white matter integrity and hippocampal atrophy Cognitive decline affects mainly the performance of episodic memory speed of sensory information processing working memory inhibitory function and long term memory It has been also

proposed that due to the aforementioned changes the aging brain engages in compensatory brain mechanism such as a broader activation of cortical regions mainly frontal rather than specialized activation Evidence suggests that similar changes occur with pathological aging but to a greater extent In this case information flow is disrupted due to neurodegeneration functional activation of posterior occipito temporal regions is decreased and as a consequence the brain fails to process sensorial input in the ventral pathway and cognitive deficits appear In the last years functional alterations associated with aging have been studied using the mathematical notion of graph theory that offers an integrative approach since it examines different properties of the brain network 1 Organization level 2 amount of local information processing 3 information flow 4 cortical community structure and 5 identification of functional anatomical hubs So graph theory offers an attractive way to model brain networks organization and to quantify their pathological deviations Previous studies have already employed this mathematical notion and demonstrated that age related neurodegeneration is often accompanied by loss of optimal network organization either due to diminished local information processing or due to progressive isolation of distant brain regions They have also found that changes in network properties may be present even in the preclinical phase which could be taken as a biological marker of disease
