Europe in the Eleventh Century Charles West, 2025-10-16 Eleventh century Europe was diverse and fast changing Historians have often debated this change through two sets of competing arguments one about the shifting role of the Church and the Papacy and the other about the rise of castellan lords and a proliferation in violence Yet these arguments about Church Reform and Feudal Revolution only really apply to one part of Europe the Latin West This book takes its cue from contemporary perceptions of Europe and includes Byzantium or East Rome and Muslim al Andalus in scope In doing so it presents a new perspective on Europe in the period Its chapters assess different scales of action and interaction within this wide space They take from the reader from the peasants living in small village settlements via the great city of Constantinople the taifa emirates kingdoms from Ireland to Hungary and the two universal empires up to contemporary ideas cosmologies and representations of the wider world Viewed in this broad setting the Latin West s remarkable expansion during this period dramatically illustrated by the First Crusade at the century s end can best be understood as the poorly controlled overspilling of internal dynamics as the established public order was disrupted Elsewhere in Europe existing structures proved more resilient and better able to accommodate internal economic and social development though remaining vulnerable to aggression from outside
