**Scheduling** Michael Pinedo, 2002 Focusing on theory and applications of scheduling the applications are drawn primarily

from production and manufacturing environments but state principles that are relevant to other settings as well The broad range of topics includes deterministic and stochastic models      **Evolutionary Scheduling** Keshav Dahal,Kay Chen Tan,Peter I. Cowling,2007-02-15 Evolutionary scheduling is a vital research domain at the interface of artificial intelligence and operational research This edited book gives an overview of many of the current developments in the large and growing field of evolutionary scheduling It demonstrates the applicability of evolutionary computational techniques to solve scheduling problems not only to small scale test problems but also fully fledged real world problems      ,      *Sapient Circuits and Digitalized Flesh* Matthew E. Gladden,2018-03-14 This book develops new insights into the evolving nature of organizations by applying the methodologies of posthumanist thought to the fields of organizational theory and management An emerging organizational posthumanism is described that makes sense of the ways in which forces of technological posthumanization are reshaping the members personnel structures information systems processes physical and virtual spaces and external environments available for use by organizations Conceptual frameworks and analytic tools are formulated that diagnose the convergence in the capacities of human and artificial actors generated by new technologies relating to human augmentation synthetic agency and digital physical ecosystems As the first systematic study of these topics this text will interest scholars and students of organizational management and management practitioners who grapple on a daily basis with the forces of technologization that are increasingly powerful drivers of organizational change      **CLC 2018: Carpathian Logistics Congress ,      Managing Operations in Manufacturing, Services and e-Business - 2nd Edition** Barin N. Nag,2019      **Real-time Design Patterns** Bruce Powel Douglass,2003 This revised and enlarged edition of a classic in Old Testament scholarship reflects the most up to date research on the prophetic books and offers substantially expanded discussions of important new insight on Isaiah and the other prophets      **Proceedings of the 2013 Joint Workshop of Fraunhofer IOSB and Institute for Anthropomatics, Vision and Fusion Laboratory** Beyerer, Juergen,Pak, Alexey,2014-07-23 This book is a collection of 13 review technical reports summarizing the presentations at the 2013 Joint Workshop of Fraunhofer IOSB and the Vision and Fusion Laboratory at KIT Karlsruhe made by the students of the both institutions The topics include image processing visual inspection pattern recognition and classification planning and decision making human machine interaction world modeling and optical signal processing      Foundations of Fuzzy Logic and Soft Computing Patricia Melin,Oscar Castillo,Luis T. Aguilar,Witold Pedrycz,2007-07-02 This book comprises a selection of papers from IFSA 2007 on new methods and theories that contribute to the foundations of fuzzy logic and soft computing These papers were selected from over 400 submissions and constitute an important contribution to the theory and applications of fuzzy logic and soft computing methodologies Soft computing consists of several computing paradigms including fuzzy logic neural networks genetic algorithms and other techniques which can be used to produce powerful intelligent systems for solving real world problems The papers of IFSA 2007 also make a contribution to this goal This book is intended to be a

major reference for scientists and engineers interested in applying new computational and mathematical tools to achieve intelligent solutions to complex problems We consider that this book can also be used to get novel ideas for new lines of research or to continue the lines of research proposed by the authors of the papers contained in the book The book is divided into 14 main parts Each part contains a set of papers on a common subject so that the reader can find similar papers grouped together Some of these parts comprise the papers of organized sessions of IFSA 2007 and we thank the session organizers for their incredible job in forming these sessions with invited and regular paper submissions

**Abstraction, Reformulation, and Approximation** Sven Koenig, Robert C. Holte, 2003-08-02 It has been recognized since the inception of Artificial Intelligence AI that abstractions problem reformulations and approximations AR A are central to human common sense reasoning and problem solving and to the ability of systems to reason effectively in complex domains AR A techniques have been used to solve a variety of tasks including automatic programming constraint satisfaction design diagnosis machine learning search planning reasoning game playing scheduling and theorem proving The primary purpose of AR A techniques in such settings is to overcome computational intractability In addition AR A techniques are useful for accelerating learning and for summarizing sets of solutions This volume contains the proceedings of SARA 2002 the fifth Symposium on Abstraction Reformulation and Approximation held at Kananaskis Mountain Lodge Kananaskis Village Alberta Canada August 2 4 2002 The SARA series is the continuation of two separate threads of workshops AAAI workshops in 1990 and 1992 and an ad hoc series beginning with the Knowledge Compilation workshop in 1986 and the Change of Representation and Inductive Bias workshop in 1988 with followup workshops in 1990 and 1992 The two workshop series merged in 1994 to form the first SARA Subsequent SARAs were held in 1995 1998 and 2000

Combinatorial Optimization Problems in Planning and Decision Making Michael Z. Zgurovsky, Alexander A. Pavlov, 2018-09-24 The book focuses on the next fields of computer science combinatorial optimization scheduling theory decision theory and computer aided production management systems It also offers a quick introduction into the theory of PSC algorithms which are a new class of efficient methods for intractable problems of combinatorial optimization A PSC algorithm is an algorithm which includes sufficient conditions of a feasible solution optimality for which their checking can be implemented only at the stage of a feasible solution construction and this construction is carried out by a polynomial algorithm the first polynomial component of the PSC algorithm an approximation algorithm with polynomial complexity the second polynomial component of the PSC algorithm also for NP hard combinatorial optimization problems an exact subalgorithm if sufficient conditions were found fulfilment of which during the algorithm execution turns it into a polynomial complexity algorithm Practitioners and software developers will find the book useful for implementing advanced methods of production organization in the fields of planning including operative planning and decision making Scientists graduate and master students or system engineers who are interested in problems of

combinatorial optimization decision making with poorly formalized overall goals or a multiple regression construction will benefit from this book

**Real Time UML** Bruce Powel Douglass, 2004 Covers UML 2.0 *An Introduction to Online Computation* Dennis Komm, 2016-10-31 This textbook explains online computation in different settings with particular emphasis on randomization and advice complexity These settings are analyzed for various online problems such as the paging problem the k server problem job shop scheduling the knapsack problem the bit guessing problem and problems on graphs This book is appropriate for undergraduate and graduate students of computer science assuming a basic knowledge in algorithmics and discrete mathematics Also researchers will find this a valuable reference for the recent field of advice complexity

*Data-Intensive Workflow Management* Daniel C. M. de Oliveira, Ji Liu, Esther Pacitti, 2022-06-01 Workflows may be defined as abstractions used to model the coherent flow of activities in the context of an in silico scientific experiment They are employed in many domains of science such as bioinformatics astronomy and engineering Such workflows usually present a considerable number of activities and activations i.e. tasks associated with activities and may need a long time for execution Due to the continuous need to store and process data efficiently making them data intensive workflows high performance computing environments allied to parallelization techniques are used to run these workflows At the beginning of the 2010s cloud technologies emerged as a promising environment to run scientific workflows By using clouds scientists have expanded beyond single parallel computers to hundreds or even thousands of virtual machines More recently Data Intensive Scalable Computing DISC frameworks e.g. Apache Spark and Hadoop and environments emerged and are being used to execute data intensive workflows DISC environments are composed of processors and disks in large commodity computing clusters connected using high speed communications switches and networks The main advantage of DISC frameworks is that they support and grant efficient in memory data management for large scale applications such as data intensive workflows However the execution of workflows in cloud and DISC environments raise many challenges such as scheduling workflow activities and activations managing produced data collecting provenance data etc Several existing approaches deal with the challenges mentioned earlier This way there is a real need for understanding how to manage these workflows and various big data platforms that have been developed and introduced As such this book can help researchers understand how linking workflow management with Data Intensive Scalable Computing can help in understanding and analyzing scientific big data In this book we aim to identify and distill the body of work on workflow management in clouds and DISC environments We start by discussing the basic principles of data intensive scientific workflows Next we present two workflows that are executed in a single site and multi site clouds taking advantage of provenance Afterward we go towards workflow management in DISC environments and we present in detail solutions that enable the optimized execution of the workflow using frameworks such as Apache Spark and its extensions
