VI SOCRATES I think that we ought to stress that we will write only about things that we have first hand experience in in a coherent way that will be useful to engineers and other scientists and stressing the formulation without being too mathematical We should write with integrity and honesty giving reference to other authors where reference is due but avoiding mentioning everybody just to be certain that our book is widely advertised Above all the book should be clear and useful

PLATO I think we should include a good discussion of fundamental ideas of how integral equations are formed pointing out that they are like two dimensional shadows of three dimensional objects

SOCRATES Stop there Remember you are not the Plato

PLATO Sorry I was carried away

ARISTOTLE I think that the book should have many applications so that the reader can learn by looking at them how to use the method

SOCRATES I agree But we should be careful It is easy to include many illustrations and examples in a book in order to disguise its meagre contents All examples

should be relevant ARISTOTLE And we should also include a full computer program to give the reader if so he wishes a working experience of the technique **CfE Higher Maths: SQA Revision Guide** ,2019-03-18 This amazing CGP Revision Guide covers the entire SQA Higher Maths course It s packed to the hilt with crystal clear notes and examples all in simple informal language you can actually understand Each topic has stacks of practice questions all complete with step by step answers and mark schemes there s never been a better way to revise **Ninth Symposium (International) on Combustion** Sam Stuart,2013-09-11 Ninth Symposium International on Combustion covers the proceedings of the Ninth Symposium International on Combustion held at Cornell University in Ithaca New York on August 27 to September 1 1962 under the auspices of the Combustion Institute The book focuses on the processes and reactions involved in combustion The selection first offers information on flame strength of propane oxygen flames at low pressures in turbulent flow and mixing and flow in ducted turbulent jets Topics include radial profile of the jetting velocity radial growth of the jet and mixing zones of a ducted jet The text then elaborates on turbulent flame studies in two dimensional open burners turbulent mass transfer and rates of combustion in confined turbulent flames and flame stabilization in a boundary layer The publication examines the theoretical study of properties of laminar steady state flames as a function of properties of their chemical components and spectra of alkali metal organic halide flames The text then takes a look at the thermal radiation theory for plane flame propagation in coal dust clouds flame characteristics of the diborane hydrazine system and studies of the combustion of dimethyl hydrazine and related compounds The selection is a dependable reference for readers interested in the processes and reactions involved in combustion
