HKDSE MOCK EXAM PAPERS **ENGLISH LANGUAGE Paper 1 Reading** Antonia Cheng, 2020-12-18 DSE Antonia Cheng 2021 DSE DSE DSE **Changing Language Teaching Through Language Testing** Liying Cheng, 2005-10-06

There has been growing interest in recent years in the influence of tests on teaching and learning a phenomenon commonly referred to as washback. Despite persistent assertions about its nature and scope, empirical studies investigating test washback are still limited in number and few of these make use of both qualitative and quantitative methods in washback research. This volume presents a study of how the introduction of the 1996 Hong Kong Certificate of Education in English, a high stakes public examination, impacted on classroom teaching and learning in Hong Kong secondary schools. The washback effect was observed initially at the larger macro level among different stakeholder groups within the Hong Kong educational context and also at the more local micro level in terms of teachers' attitudes, teaching content and classroom interactions. This study provides a theoretical background to the washback concept, discusses the need for empirical investigation of washback, describes the use of a mixed methodology approach in washback research, offers insights into the role of tests as agents of innovation and change in the classroom and broader educational context. This volume will be of particular relevance to language test developers and researchers interested in the consequential validity of tests; it will also be of interest to teachers, curriculum designers, policymakers and others in education concerned with the interface between language testing and teaching practices. *Book jacket* *English Language Assessment and the Chinese Learner* Liying Cheng, Andy Curtis, 2010-03-17 Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive up-to-date relevant picture of English language assessment for students in China Mainland, China, Hong Kong and Taiwan and for Chinese learners of English around the world. **English Language Testing in Hong Kong** Joseph Boyle, Peter Falvey, 1994 **Washback in Language Testing** Liying Cheng, Yoshinori Watanabe, WITH Andy Curtis, 2004-02-04 Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching and learning, and presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores

for various educational and social purposes in society nowadays makes the washback effect a high interest phenomenon in the day to day educational activities of teachers researchers program coordinators directors policymakers and others in the field of education Washback in Language Testing Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts including educational and psychological testing experts as well as alternative assessment people in all fields and for policy and decision makers in educational and testing organizations
