Boal, D.N. Livingstone, 2003-09-02 Placing human action and perception at the centre of the subject this book considers the effects of mankind on the environment drawing particularly from William Kirk's work on the behavioural environment model Reviewing Kirk's original model in light of recent ideological debate and extensive new evidence this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man's relationship with the ecological environment **Japan-Bashing** Narrelle Morris, 2013-01-11 The aim of this book is to examine and analyse the phenomenon of Japan bashing from its invention and popularisation in the United States in the late 1970s to the emergence of other national variants including in Australia and Japan to its gradual decline in the late 1990s It is the first major book length study of Japan bashing from a multinational perspective one that attempts to place Japan bashing in its

proper historical context and to examine its operation and legacy in the twenty first century Despite its importance in the study of discourses about Japan as well as in understanding broader global changes in the late twentieth century and beyond the phenomenon of Japan bashing remains largely neglected in published writings Moreover it is a far more complex phenomenon than has been assessed thus far While on first glance Japan bashing merely seems to recall other periods in which Japan has been viewed as a dangerous other to the West such as the Western emphasis on the yellow peril from the late nineteenth century as well as Allied anti Japanese propaganda during World War II Japan bashing also had its own distinctive characteristics Moreover while Japan bashing is often described as a quaint historical rather than a pressing contemporary phenomenon it is actually by no means extinct The ongoing influence of Japan bashing also has parallels in other bashing phenomena such as China bashing This book will be of interest to scholars and postgraduate students in Japanese studies and international relations

Curriculum and Environmental Education Alan Reid, 2019-11-14 This collection traces the development and findings of curriculum studies of environmental education since the mid 1970s Based on a virtual special issue of the Journal of Curriculum Studies the volume identifies a series of curriculum challenges for and from environmental education These include key questions in curriculum politics planning and implementation including which educative experiences should a curriculum foster and why what the scope of a worthwhile curriculum should be and how it should be decided organised and reworked why distinctive curricula are provided to different groups of students and how curriculum should best be enacted and evaluated The editor and contributors call for renewed attention to the possibilities for future directions in research in light of previously published work and innovations in scholarship They also offer critical commentary on curriculum critique and crisis in environmental education through new material and previous studies from the journal by addressing three key themes perspectives on curriculum and environment education accounting for curriculum in environmental education and changes in curriculum for environmental education
