Education and Ethics in the Life Sciences Brian Rappert, 2010-06-01 At the start of the twenty first century warnings have been raised in some quarters about how by intent or by mishap advances in biotechnology and related fields could aid the spread of disease Science academics medical organisations governments security analysts and others are among those that have sought to raise concern EDUCATION AND ETHICS IN THE LIFE SCIENCES examines a variety of attempts to bring greater awareness to security concerns associated with the life sciences It identifies lessons from practical initiatives across a wide range of national contexts as well as more general reflections about education and ethics The eighteen contributors bring together perspectives from a diverse range of fields including politics virology sociology ethics security studies microbiology and medicine as well as their experiences in universities think tanks and government In offering their assessment about what must be done and by whom each chapter addresses a host of challenging practical and conceptual questions EDUCATION AND ETHICS IN THE LIFE SCIENCES will be of interest to those planning and undertaking training activities in other areas In asking how education and ethics are being made to matter in an emerging area of social unease it will also be of interest to those with more general concerns about professional conduct

Introduction to Data Mining for the Life Sciences Rob Sullivan, 2011-12-26 Data mining provides a set of

new techniques to integrate synthesize and analyze data uncovering the hidden patterns that exist within Traditionally techniques such as kernel learning methods pattern recognition and data mining have been the domain of researchers in areas such as artificial intelligence but leveraging these tools techniques and concepts against your data asset to identify problems early understand interactions that exist and highlight previously unrealized relationships through the combination of these different disciplines can provide significant value for the investigator and her organization **Mathematical**

Modeling in the Social and Life Sciences Michael Olinick, 2014-05-05 The goal of this book is to encourage the teaching and learning of mathematical model building relatively early in the undergraduate program The text introduces the student to a number of important mathematical topics and to a variety of models in the social sciences life sciences and humanities

Data Integration in the Life Sciences Norman W. Paton, Paolo Missier, Cornelia Hedeler, 2009-07-21 Data integration in the life sciences continues to be important but challenging The ongoing development of new experimental methods gives rise to an increasingly wide range of data sets which in turn must be combined to allow more integrative views of biological systems Indeed the growing prominence of systems biology where mathematical models characterize behaviors observed in experiments of different types emphasizes the importance of data integration to the life sciences In this context the representation of models of biological behavior as data in turn gives rise to challenges relating to provenance data quality annotation etc all of which are associated with significant research activities within computer science The Data Integration in the Life Sciences DILS Workshop Series brings together data and knowledge management researchers from the computer science research community with bioinformaticians and computational biologists to improve the understanding of how emerging data integration techniques can address requirements identified in the life sciences *Dual-use life science*

research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives **Science and Engineering Personnel**, 1985
