Research Memorandum ,1958 Catalogue, Books and Journals in Advanced Mathematics American Mathematical Society,1977 Crew Size and Maritime Safety Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Marine Board,1991-02-01 U S oceangoing vessels have half the crew size of 30 years ago thanks to automation and mechanization in the shipping industry But are reductions in crew size increasing the risk of vessel accidents Crew Size and Maritime Safety explores how we can minimize risk without hindering technology presenting the most thorough analysis available of key issues such as domestic versus foreign manning practices and safety performance effect of crew size on crew fatigue level of training and ship maintenance and modernizing the U S Coast Guard approach to crew size regulation The volume features a trend analysis of 20 years of maritime safety data analyzing U S and international laws and treaties concerning ship manning and making recommendations for improvements In addition it includes a model for setting optimum crew levels based on systems engineering and tested with actual ships **Scientific and Technical Aerospace Reports** ,1990 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database The Chemical News and Journal of Physical Science ,1880 **Defectives in the Land** Douglas C. Baynton,2016-08-12 Baynton argues that screening out disability emerged as the primary objective of U S immigration policy during the late 19th and early 20th century Journal of Social History Immigration history has largely focused on the restriction of immigrants by race and ethnicity overlooking disability as a crucial factor in the crafting of the image of the undesirable immigrant Defectives in the Land Douglas C Baynton s groundbreaking new look at immigration and disability aims to change this In the late nineteenth and early twentieth centuries Baynton explains immigration restriction in the United States was primarily intended to keep people with disabilities known as defectives out of the country The list of those included is long the deaf blind epileptic and mobility impaired people with curved spines hernias flat or club feet missing limbs and short limbs those unusually short or tall people with intellectual or psychiatric disabilities intersexuals men of poor physique and men diagnosed with feminism Not only were disabled individuals excluded but particular races and nationalities were also identified as undesirable based on their supposed susceptibility to mental moral and physical defects In this transformative book Baynton argues that early immigration laws were a cohesive whole a decades long effort to find an effective method of excluding people considered to be defective This effort was one aspect of a national culture that was increasingly fixated on competition and efficiency anxious about physical appearance and difference and haunted by a fear of hereditary defect and the degeneration of the American race The Saturday Review of Politics, Literature, Science and Art ,1868 **Princeton Alumni Weekly** ,1946 **We Could Not Fail** Richard Paul,Steven Moss,2015-05-01 The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery discrimination and violence against African Americans

Presidents John F Kennedy and Lyndon Johnson utilized the space program as an agent for social change using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty We Could Not Fail tells the inspiring largely unknown story of how shooting for the stars helped to overcome segregation on earth Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights They recount how these technicians mathematicians engineers and an astronaut candidate surmounted barriers to move in some cases literally from the cotton fields to the launching pad The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges patenting new inventions holding elective office and reviving and governing defunct towns Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration We Could Not Fail demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement Current Catalog National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 Chemical News and Journal of Physical Science ,1883
