enriched and smart learning experience experience in blended learning institutional policies and strategies and online and
collaborative learning Evaluating Achievement of Senior High School Students in Canada Lenora Perry Fagan,Dana
Spurrell,1995 In Canada today there is a clear move toward a more outcomes based education system This report examines
the state of high school student assessment and reviews standards and accountability strategies It reports on the policies
programs and initiatives in all provincial ministries or departments of education and a sample of school boards across the
country Data were derived from a telephone survey of departmental ministerial representatives from all 10 provinces and the
2 territories and from a questionnaire that was mailed to 279 school boards A total of 140 boards responded a 50 percent
response rate Data show that both boards and ministries are putting more emphasis on the development of comprehensive
policies to cover all aspects of student evaluation There is some movement away from relying on paper and pencil testing as
the sole means of evaluation the use of more authentic performance based approaches and a greater variety of assessment
techniques are being promoted Some of the best practices in high school evaluation involve use of a broad range of
assessment methods introduction of or improvements to provincial examinations greater use of summative and formative
evaluations greater emphasis on modifying evaluation for special needs students use of performance based assessment and
more reporting to parents and the public Thirteen tables are included Appendices contain copies of the two questionnaires
and selected school board material Contains 19 references LMI *Science Reporter* ,1995
