The Mathematics Education for the Future Project - Proceedings of the 14th International Conference Alan Rogerson, Janina Morska, 2017-07-01 This volume contains the papers presented at the International Conference on Challenges in Mathematics Education for the Next Decade held from September 10-15, 2017 in Balatonfured, Hungary. The Conference was organized by The Mathematics Education for the Future Project, an international educational project founded in 1986.

Discrete Geometry for Computer Imagery David Coeurjolly, Isabelle Sivignon, Laure Tougne, Florent Dupont, 2008-04-03 This book constitutes the refereed proceedings of the 14th IAPR TC 18 International Conference on Discrete Geometry for Computer Imagery (DGCI 2008) held in Lyon, France, in April 2008. The 23 revised full papers and 22 revised poster papers presented together with 3 invited papers were carefully reviewed and selected from 76 submissions. The papers are organized in topical sections on models for discrete geometry, discrete and combinatorial topology, geometric transforms, discrete shape representation, recognition and analysis, discrete tomography, morphological analysis, discrete modelling and visualization, as well as discrete and combinatorial tools for image segmentation and analysis.

Perspectives on the Teaching of Geometry for the 21st Century C. Mammana, V. Villani, 2012-12-06 In recent years, geometry seems to have lost large parts of its former central position in mathematics teaching in most countries. However, new trends have begun to counteract this tendency. There is an increasing awareness that geometry plays a key role in mathematics and learning mathematics. Although geometry has been eclipsed in the mathematics curriculum, research in geometry has blossomed as new ideas have arisen from inside mathematics and other disciplines, including computer science. Due to reassessment of the role of geometry, mathematics educators and mathematicians face new challenges. In the present ICMI study, the whole spectrum of teaching and learning of geometry is analysed. Experts from all over the world took part in this study, which was conducted on the basis of recent international research, case studies and reports on actual school practice. This book will be of particular interest to mathematics educators and mathematicians who are involved in the teaching of geometry at all educational levels, as well as to researchers in mathematics education. **InCider**, 1991.

Real and Complex Geometry Liviu Ornea, 2025-08-02 The book covers a wide area of hot subjects in real and complex differential geometry, such as conformal geometry, special holonomy, Sasakian geometry, Kähler and non-Kähler metrics, classification of compact complex surfaces, Einstein metrics, bi-Hermitian geometry, non-integrable almost complex structures, etc. All of these are rather close to Paul Gauduchon's themes and influential results in the past fifty years. The reader will find fifteen papers, a few surveys, but the majority containing new and exciting results. The book thus gives an idea of the present research interests of some of the best experts today in real and complex differential geometry, including Vestislav Apostolov, Florin Belgun, Charles Boyer, Georges Dloussky, Anna Fino, Gueo Grantcharov, Claude LeBrun, Andrei Moroianu, Massimiliano Pontecorvo, Simon Salamon, Andrew Swann, Adriano Tomassini, Valentino Tosatti, and

Nibble ,1989 Christ Among Them Edoardo Mungiello,2009-05-27 This essay newly interprets the rise of the individual within the Italian peninsula between 1180 and 1300 It follows the historical events and the cultural products that define the period keeping in mind that the creators were conscious of a tangible real Christ in their midst For it is the time when Jesus was known to be in the Eucharist as a carnal potentiality as well as a time when Europeans on Crusade had reached his temporal abode As Christ as neighbor became a consistent idea the relationship towards that idea became one of accommodation making subsequent worship a form of individualism The later Renaissance was as much a specific reaction to a particular understanding of Christology within the cultural sphere as it was a reawakening of Classical ideals through a new paradigm of European selfhood outside of Christianity Understood in this way the Incarnation helped to produce an action based Christianity amenable to the needs of the Roman Church The later insistence upon text and notions of personal conscience that identifies the Reformation can now be seen as a true end to the Renaissance Christian praxis which began with the excitement over Christ among them *Thinking, Feeling, and Being* Ignacio Matte-Blanco,2003-09-02 Ignacio
