

Memorandum

Dated: 14 January 2023

To: Sales & Marketing Group

From: Praveenkumar Revankar, Product Engineering

Subject: Delay in release timelines of Feature A and Feature B.

Purpose:

The purpose of this document is to notify the cross-functional group about sudden changes in release timelines of Feature A and Feature B and to reinform the group to reprioritize certain tasks for Sales and Marketing for the release.

Background/Context:

We have been working together on our key USP features 'Feature A' and 'Feature B' for targeting their release this quarter. Due to unforeseen circumstances, there is a change in the release timelines and the new timeline will be shared shortly in Scrum of Scrum meeting where a representative from Sales has been invited.

Action:

Even though it looks like a major setback and current activities w.r.t. The release can be paused, there are certain actions that have to be performed in this quarter. The same has been conveyed in Jira, marking the work items with labels "Q1_Paused" and "Q1_Must." Please reprioritize your internal activities based on the labels in Jira and ensure a final plan reflected in Jira on or before 30 January 2023.

Conclusion:

We might be delayed with the release but we are not affecting the business. The necessary strategy is defined and put in place to ensure customers can solve their problems using our support until Feature A and Feature B release.

Thanks,
Praveenkumar Revankar

Patent Office, 1949 **The Power of Economic Ideas** Alex Millmow, 2010-05-01 Economics Keynes once wrote can be a very dangerous science Sometimes though it can be moulded to further the common good though it might need a leap in mental outlook a whole new zeitgeist to be able do do This book is about a transformation in Australian economists thought and ideas during the interwar period It focuses upon the interplay between economic ideas players and policy sometimes in the public arena In a decade marked by depression recovery and international political turbulence Australian economists moved from a classical orthodox economic position to that of a cautious Keynesianism by 1939 We look at how a small collective of economists tried to influence policy making in the nineteen thirties Economists felt obliged to seek changes to the parameters as economic conditions altered but more importantly as their insights about economic management changed There are three related themes that underscore this book Firstly the professionalisation of Australian economics took a gigantic leap in this period aided in part by the adverse circumstances confronting the economy but also by the aspirations economists held for their discipline A second theme relates to the rather unflattering reputation foisted upon interwar economists after 1945 That transition underlies a third theme of this book namely how Australian economists were emboldened by Keynes s General Theory to confidently push for greater management of economic activity By 1939 Australian economists conceptualized from a new theoretic framework and from one which they advanced comment and policy advice This book therefore will rehabilitate the works of Australian interwar economists arguing that they not only had an enviable international reputation but also facilitated the acceptance of Keynes s General Theory among policymakers before most of their counterparts elsewhere **Federal Register**, 2012-07

Section 1939-1961 Alec Cairncross, Nita Watts, 2022-01-26 First published in 1989 The Economic Section 1939 1961 is a rare study of economic policymaking as seen from the inside The Economic Section formed in 1939 1940 was the first group of professional economists to operate full time at the centre of government in the United Kingdom and its views on many issues of economic policy were frequently decisive In this volume two former members of the Section draw on their memories

and on the public records to trace the history of the Section from the early days of the war to the end of the 1950s Alec Cairncross and Nita Watts discuss the advice offered by the Section the controversies that followed advisers and how Ministers responded They present a picture of the day to day working of the Section but inevitably focus on the more dramatic episodes when major issues of policy were in dispute or important new issues were posed Separate chapters are devoted to the Section's role in four main areas fiscal monetary incomes and external economic policy In illuminating influence on policy exercised by officials and the place of expert advice in economic management this work will appeal to a wide range of readers It offers the student of economics or politics a picture of what in practice goes to the making of economic policy

Regional Development in an Age of Structural Economic Change Piet Rietveld, Daniel Shefer, 2024-02-22 First published in 1999 this volume addresses various themes in regional development studies from the perspective of structural economic change Particular attention is paid to factors having long run implications for regional development such as innovation and knowledge production Innovation and research and development activities appear to take place at particular locations This has implications for long run spatial and sectoral developments Another factor is transport infrastructure its impact on efficiency and equity is surveyed Other themes covered relate to the role of tourism and adjustments in urban economies The book aims to offer a balance between modelling and non modelling approaches In addition to country specific contributions some are offered at the European level

An Analysis of the Current Services Budget Contained in the President's Budget for Fiscal Year 1988, 1987

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with

asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics
