14 Grade R Increment:

Advancing Human Assessment Randy E. Bennett, Matthias von Davier, 2017-10-17 This book is open access under a CC BY NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de facto standards in educational and psychological measurement, including item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of International Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS), and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment.

Learning to Read and Write in One Elementary School Connie Juel, 2012-12-06 When a fourth-grade student Jenny was asked about reading, she stated, "I love to read; you get real neat ideas. I really like books about animals and biographies. I'm writing my autobiography now." Oh, I also really like Judy Blume books. Her enthusiasm for reading is evident as she tells you about the Judy Blume book she just read, *Are You There God? It's Me, Margaret* (1970). Jenny reads almost every night at home. Jenny's classmate, through 4 years of elementary school, Anna responds when asked about reading, "I hate to read; it's boring." Anna says she never reads at home. She says she'd rather watch television or play with friends. Anna would even rather clean her room than read. She explains, "I'd rather clean my room because it makes the room look neat. Reading makes my head hurt because it's so boring and no fun." Jenny and Anna attended a large neighborhood elementary school in Austin, Texas. The school is located in a lower socioeconomic status (SES) area of small houses, duplexes, and mid-rise apartments. About 45% of the children at the school are Hispanic, 35% are African American, and 20% are Anglo. The school consistently ranks among the lowest schools in the district on standardized reading achievement tests. Upon entering first grade, neither Jenny nor Anna could read the words that were to appear in their first preprimer reader.

Foundations of Reading Acquisition and Dyslexia Benita A. Blachman, 2013-03-07 The chapters in this volume are based on presentations made at a recent conference on cognitive and linguistic foundations of reading acquisition. The researchers who participated have all made contributions to the theoretical and empirical understanding of how children

learn to read They were asked to address not only what they have learned from their research but also to discuss unsolved problems This dialogue prompted numerous questions of both a theoretical and applied nature generated heated debate and fueled optimism about the important gains that have been made in the scientific understanding of the reading process especially of the critical role played by phonological abilities
