14 November Memorandum For Paper 1 Life Sciences:

Current Catalog National Library of Medicine (U.S.),1968 Includes subject section name section and 1968 1970 technical reports *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965 70 **Philosophers and Kings** Gary McCulloch,2002-04-18 Philosophers and Kings examines the theme of education for leadership in English secondary education during the twentieth century Freedom's Laboratory Audra J. Wolfe,2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom s Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom s Laboratory is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States

Energy Research Abstracts ,1989 **The Final Victim of the Blacklist** Gerald Horne,2006-09-19 Before he attained notoriety as Dean of the Hollywood Ten the blacklisted screenwriters and directors persecuted because of their varying ties to the Communist Party John Howard Lawson had become one of the most brilliant successful and intellectual screenwriters on the Hollywood scene in the 1930s and 1940s with several hits to his credit including Blockade Sahara and Action in the North Atlantic After his infamous almost violent 1947 hearing before the House Un American Activities Committee Lawson spent time in prison and his lucrative career was effectively over Studded with anecdotes and based on previously untapped archives this first biography of Lawson brings alive his era and features many of his prominent friends and associates including John Dos Passos Theodore Dreiser F Scott Fitzgerald Charles Chaplin Gene Kelly Edmund Wilson Ernest Hemingway Humphrey Bogart Dalton Trumbo Ring Lardner Jr and many others Lawson s life becomes a prism through which we gain a clearer perspective on the evolution and machinations of McCarthyism and anti Semitism in the United States on the influence of the left on Hollywood and on a fascinating man whose radicalism served as a foil for launching the political

careers of two Presidents Richard Nixon and Ronald Reagan In vivid marvelously detailed prose Final Victim of the Blacklist restores this major figure to his rightful place in history as it recounts one of the most captivating episodes in twentieth century cinema and politics **Scientific and Technical Aerospace Reports** ,1989 Anthropologica ,2005 **Social Hygiene in Twentieth Century Britain** Greta Jones,2025-04-01 In the early twentieth century a group of writers and publicists began to talk and write about social hygiene or more commonly known as the theory of eugenics By this they meant the improvement of the quality of the population by a conscious intervention in the biological laws which governed its growth development and reproduction This discussion led to the foundation of several social hygiene eugenics organisations the Eugenics Society the National Council for Mental Hygiene the Central Association for Mental Welfare the People s League of Health the New Health Society the National Institute for Industrial Psychology and several others First published in 1986 Social Hygiene in Twentieth Century Britain now with a new preface by the author suggests that they were linked by a set of interrelated ideas about health and social progress which was influential in the period from the First World War to the aftermath of the Second Its basic contention is that these groups were influenced by Social Darwinism and that they based their policies on two foundations the elimination of the unfit and the improvement of the general level of industrial and personal efficiency among the working class The book offers a critique of Foucault s theory of the development of the sciences of human life as well as relating the ideas of these groups to the social climate of British life The social management they envisaged was based on an expectation of deflation and a high level of unemployment They can thus be seen as throwing light on developments in Conservative policy on family life and the like **An American Theatre** Richard Somerset-Ward,Joanne Woodward,Paul Newman,2005-01-01 This fascinating book traces the entire story of Westport Country Playhouse from its beginnings in the midst of the Depression to its 75th anniversary renovations and rejuvenation Filled with colorful characters it is a story that will appeal to everyone who has ever been enchanted by live theatre

Pierre Koenig Neil Jackson,2019-02-05 A heavily illustrated and highly designed tribute to Los Angeles architect Pierre Koenig a key figure of the Los Angeles Modernist movement In this remarkable and gorgeously illustrated book Neil Jackson presents a vibrant profile of the Los Angeles architect Pierre Koenig who Time magazine said lived long enough to become cool twice From the influences of Koenig s youth in San Francisco and his military service during World War II to the Case Study Houses and his later award laden years Jackson s study plots the evolution of Koenig s oeuvre against the backdrop of Los Angeles a city that both shaped and was shaped by his architecture The book is anchored by Jackson s exciting discoveries in Koenig s archive at the Getty Research Institute Drawings photographs diaries letters lecture notes building contracts and university projects many of which are published for the first time provide an expanded understanding of Koenig and additional context for his architectural achievements An examination of Koenig s Case Study Houses shows how his often single minded and pragmatic approach to domestic architecture recognized the advantages of production housing

and presciently embraced sustainable ecologically responsible design A new account of the Chemehuevi housing project in Havasu Lake California demonstrates the special role that learning and teaching played in the development of his architecture Over his fifty year career Koenig not only designed iconic houses but also directed their restoration and curated their legacy ensuring that his work could be seen and appreciated by present and future admirers of midcentury Los Angeles

Global Transformations in the Life Sciences, 1945-1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life's molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded In Sputnik's Shadow Zuoyue Wang, 2009 In Sputnik's Shadow traces the rise and fall of the President's Science Advisory Committee from its ascendance under Eisenhower to its demise during the Nixon years Zuoyue Wang examines key turning points during the twentieth century including the beginning of the Cold War the debates over nuclear weapons the Sputnik crisis in 1957 the struggle over the Vietnam War and the eventual end of the Cold War showing how the involvement of scientists in executive policymaking evolved over time and brings new insights to the intellectual social and cultural histories of the era **Sailors, Scientists and Rockets** Albert B.
