Elmore, 2021-10-12 Winner of the 2022 IACP Award for Food Issues and Matters Finalist for the 2022 George Perkins Marsh Prize Finalist for the 2022 Hagley Prize in Business History An authoritative and eye opening history that examines how Monsanto came to have outsized influence over our food system Monsanto a St Louis chemical firm that became the world's largest maker of genetically engineered seeds merged with German pharma biotech giant Bayer in 2018 but its Roundup Ready seeds introduced twenty five years ago are still reshaping the farms that feed us When researchers found trace amounts of the firm's blockbuster herbicide in breakfast cereal bowls Monsanto faced public outcry Award winning historian Bartow J Elmore shows how the Roundup story is just one of the troubling threads of Monsanto's past many told here and woven together for the first time A company employee sitting on potentially explosive information who weighs risking everything to tell his story A town whose residents are urged to avoid their basements because Monsanto's radioactive waste laces their homes foundations Factory workers who peel off layers of their skin before accepting cash bonuses to continue dirty jobs An executive wrestling with the ethics of selling a profitable product he knew was toxic Incorporating global

fieldwork interviews with company employees and untapped corporate and government records Elmore traces Monsanto's astounding evolution from a scrappy chemical startup to a global agribusiness powerhouse Monsanto used seed money derived from toxic products including PCBs and Agent Orange to build an agricultural empire promising endless bounty through its genetically engineered technology Skyrocketing sales of Monsanto's new Roundup Ready system stunned even those in the seed trade who marveled at the influx of cash and lavish incentives into their sleepy sector But as new data emerges about the Roundup system and as Bayer faces a tide of lawsuits over Monsanto products past and present Elmore's urgent history shows how our food future is still very much tethered to the company's chemical past

Labour and Economic Change in Southern Africa c.1900-2000 Rory Pilossof, Andrew Cohen, 2021-06-03 This book explores the social and economic development of Zimbabwe Zambia and Malawi over the course of the twentieth century These three countries have long shared and interconnected pasts All three were drawn into the British Empire at a similar time and the formation of the ill-fated Federation of Rhodesia and Nyasaland formally linked these countries together for a decade in the mid-twentieth century This formal political

relationship created dynamics that resulted in yet closer economic and social links After Federation the economic realities of industry transport and labour supplies meant that these three countries continued to be intricately interconnected Yet despite these connected pasts comparative work on the economic histories of Malawi Zambia and Zimbabwe and how these change over time is rare This book addresses the gap by providing the first comprehensive collection of labour and census data across the twentieth century for these three countries The different economic models and performances of these states offer good comparison allowing researchers to look at different models of development and how these played out over the long term The book provides data on population growth and change industrial and occupational structure and the various shifts in what the economically active population did It will be useful for historians economists development studies scholars and non governmental organisations working on twentieth century and contemporary southern Africa **General**
