Modelling-based Teaching in Science Education John K. Gilbert,Rosária Justi,2016-05-30 This book argues that modelling should be a component of all school curricula that aspire to provide authentic science education for all The literature on modelling is reviewed and a model of modelling is proposed The conditions for the successful implementation of the model of modelling in classrooms are explored and illustrated from practical experience The roles of argumentation visualisation and analogical reasoning in successful modelling based teaching are reviewed The contribution of such teaching to both the learning of key scientific concepts and an understanding of the nature of science are established Approaches to the design of curricula that facilitate the progressive grasp of the knowledge and skills entailed in modelling are outlined Recognising that the approach will both represent a substantial change from the content transmission approach to science teaching and be in accordance with current best practice in science education the design of suitable approaches to teacher education are discussed Finally the challenges that modelling based education pose to science education researchers advanced students of science education and curriculum design teacher educators public examiners and textbook designers are all outlined Teaching and Learning Online Franklin S. Allaire,Jennifer E. Killham,2023-01-01 Science is unique among

the disciplines since it is inherently hands on However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching

and learning Killham et al 2014 Wong et al 2018 PreK 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018 This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy Brigido Borrachero Bermejo Gunning Duran Duran 2004 Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation
