Environmental and Natural Resource Economics Jonathan M. Harris, Brian Roach, 2017-06-26 Environmental issues are of fundamental importance and a broad approach to understanding the relationship of the human economy and the natural world is essential. In a rapidly changing policy and scientific context, this new edition of *Environmental and Natural Resource Economics* reflects an updated perspective on modern environmental topics. Now in its fourth edition, this book includes new material on climate change, the cost competitiveness of renewable energy, global environmental trends, and sustainable economies. The text provides a balanced treatment of both standard environmental economics and ecological economics based on the belief that these two approaches are complementary. Several chapters focus on the core concepts of environmental economics, including the theory of externalities, the management of public goods, the allocation of resources across time, environmental valuation, and cost-benefit analysis. Material on ecological economics includes such topics as macroeconomic scale, entropy, and green national accounting. Topical chapters focus on energy, climate change, water resources, international trade, forests, fisheries, and agriculture, with an emphasis on designing effective policies to promote sustainability and a green economy. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective, combined with its emphasis on real-world policies, is particularly appealing to both instructors and students. This is the ideal text for classes on environmental, natural resource, and ecological economics. The book's companion website is available at <http://www.bu.edu/eci/education/materials/textbooks/environmental-and-natural-resource-economics>.

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly, even improbably, successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916 as Schenley High School, it was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to de facto segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A

memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools The Permian Timescale S.G. Lucas,S.Z.

Eleanor Cameron 1912 1996 was an innovative and genre defying author of children s fiction and children s literature criticism From her beginnings as a librarian Cameron went on to become a prominent and respected voice in children s literature writing one of the most beloved children s science fiction novels of all time The Wonderful Flight to the Mushroom Planet and later winning the National Book Award for her time fantasy The Court of the Stone Children In addition Eleanor Cameron played an often vocal role in critical debates about children s literature She was one of the first authors to take up literary criticism of children s novels and published two influential books of criticism including The Green and Burning Tree One of Cameron s most notable acts of criticism came in 1973 when she wrote a scathing critique of Roald Dahl s Charlie and the Chocolate Factory Dahl responded in kind and the result was a fiery imbroglio within the pages of the Horn Book Magazine Yet despite her many accomplishments most of Cameron s books went out of print by the end of her life and her star faded This biography aims to reinsert Cameron into the conversation by taking an in depth look at her tumultuous early life in Ohio and California her unforgettably forceful personality and criticism and her graceful heartfelt novels The biography includes detailed analysis of the creative process behind each of her published works and how Cameron s feminism environmentalism and strong sense of ethics are reflected in and represented by her writings Drawn from over twenty interviews thousands of letters and several unpublished manuscripts in her personal papers Eleanor Cameron is a tour of the most exciting and creative periods of American children s literature through the experience of one of its valiant purveyors and champions **Industrial Development Report** United Nations Publications,2016-01-14 This report looks at

how technology and innovation achieves inclusive and sustainable industrial development ISID Its main finding is that ISID is feasible and technology can simultaneously serve all three dimensions of sustainability including economic social and environmental Rapid inclusive and sustainable industrialization can happen more frequently provided that policymakers firmly steer the industrialization process with opportune policies and avoid past mistakes In some cases the spread of technology has not materialized in concrete growth opportunities because of the lack of technological capabilities Innovation needs to be supported by interventions strengthening the process from invention to adoption as capabilities are developed and high tech manufacturing sectors are created seeing higher rates of sustainable growth Psychology: Australia and
