Teacher Education in Professional Learning Communities Xuefeng Huang, 2018-06-20 This book explores the unique experiences of a sister school network in Canada and China contextualized through the lens of the Reciprocal Learning Project which supports the relationship between a school network and teacher education exchange program of two countries Huang uses theoretical viewpoints from teacher learning and comparative education research to analyse and interpret what has happened in the emerging cross cultural school network The book

juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated developed and sustained as well as the impact brought about from these collaborations The book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross cultural collaboration and learning

 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience *Future Information Engineering and Manufacturing Science* Dawei Zheng, 2015-02-25
 The 2014 International Conference on Future Information Engineering and Manufacturing Science FIEMS 2014 was held June 26 27 in Beijing China The objective of FIEMS 2014 was to provide a platform for researchers engineers academics as well as industry professionals from all over the world to present their research results and development acti **Reframed** Stuart Shanker, 2020-03-23
 For Stuart Shanker the possibility of a truly just and free society begins with how we see and nurture our children Shanker is renowned for using cutting edge neuroscience to help children feel happy and think clearly by better regulating themselves In his new book Reframed Shanker explores self regulation in wider social terms Whereas his two previous books Calm Alert and Learning and Self Reg were written for educators and parents Reframed the final book in the trilogy unpacks the unique science and conceptual practices that are the very lifeblood of Self Reg making it an accessible read for new Self Reggers Reframed is grounded in the three basic principles of Shanker Self Reg There is no such thing as a bad lazy or stupid kid All people can learn to self regulate in ways that promote rather than constrict growth There is no such thing as a fixed outcome trajectories can always be changed at any point in the lifespan if only we have the right knowledge

and tools Only a society that embraces these principles and strives to practice them argues Shanker can become a truly just society The paradigm revolution presented in Reframed not only helps us understand the harrowing time we are living through but inspires a profound sense of hope for the future Shanker shows us how to build a compassionate society one mind at a time

The Mathematical Resilience Book Sue Johnston-Wilder,Clare Lee,2024-06-13 This book is about mathematical resilience what it is why it is important how learners can develop it and how teachers can teach in ways that help learners become mathematically resilient Teaching for mathematical resilience helps mitigate mathematics anxiety which is often hidden from view as poor behaviour avoidance and underachievement and can

have long term implications especially for people's employment opportunities and career progression. Written by a team of expert contributors that specialise in teaching every age of learner from primary school through to adult, the book shows that everyone can progress in mathematics if they have Mathematical Resilience and sets out practical strategies to support learners in developing this important attribute. Chapters cover: How to measure mathematics anxiety and resilience; Tools for building mathematical resilience; Building a resilient mathematical learning environment; The power of coaching; Working with groups, individuals and support staff; Supporting parents and carers. The world faces huge challenges that involve mathematical thinking including climate change and economic injustice. This valuable text shows teachers how they can help learners to engage positively with mathematical learning and reach their full potential.

Handbook of Research on Integrating ICTs in STEAM Education
Xeftiris, Stefanos, 2022-05-27

Modern society gives great importance to scientific and technological literacy, development of 21st century skills and creating individuals who are not passive users of ICT tools but active thinkers and even tinkerers. The learning process is thus constantly evolving to facilitate the acquisition of such skills such as setting goals and making evidence based decisions, thinking critically and solving problems while efficiently managing time as well as using technology cooperating ethically and communicating effectively. STEAM is the approach to learning that uses concepts from natural sciences, technology, engineering, arts and mathematics to foster critical thinking, computational and design thinking as well working effectively together, mimicking the process followed by scientists. The end goal is engaged and motivated students who participate in experiential and inquiry based learning in fun, immersive environments that facilitate learning through a creative process. The Handbook of Research on Integrating ICTs in STEAM Education includes current research focusing on the development of STEAM and ICT educational practices, tools, workflows and frames of operation that encourage science skills but also skills related to the arts and humanities such as creativity, imagination and reflection on ethical implications. Covering topics such as early childhood education, machine learning education, educational robotics and web based simulations, this major reference work is an essential resource for engineers, educators of both K-12 and higher education, education administration, libraries, pre-service teachers, computer scientists, researchers and academics.
