## 2014 Life Science Paper Scope:

**Trends in Teaching Experimentation in the Life Sciences** Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) *Ethics and Integrity in Health and Life Sciences Research* Zvonimir Koporc, 2018-12-06 This important volume covers ethics and integrity in health and life sciences research It addresses concerns in gene editing dual use and misuse of biotechnologies big data and nutritional science in health and medicine and covers attempts at ensuring ethical practices in such fields are shared internationally **Atlas of Macroscopes** Katy Börner, Elizabeth G. Record, Todd Theriault, 2025-10-14 A fascinating data adventure through the lens of macroscopes which offer us illuminating and holistic views of our ever changing world In Atlas of Macroscopes Katy Börner Elizabeth Record and Todd Theriault take you on an epic data adventure You will explore data landscapes designed as uniquely interactive spaces and learn more about our world and your place in it You will gain new perspectives on how to gather understand and communicate data as well as how to best use it You will discover what it means to touch data that informs and inspires Transcending the static nature of the maps featured in the initial trilogy this fourth Atlas showcases 40 real life macroscopes or interactive data visualizations that were displayed in the first decade 2015 2024 of the traveling exhibit Places Spaces Mapping Science Encompassing vast amounts of data macroscopes give us holistic views of complex systems or networks They provide an entry point for scientists and laypeople alike and empower us to engage directly with large datasets and to conduct our own lines of questioning As interactive tools macroscopes connect data creators and users As portals to continuously evolving data macroscopes can serve as windows to the dynamics of any terrain personal or professional local or global and offer key insights into our surroundings and even our place in the universe While big data is creating new ways to view and understand information macroscopes help us see the big picture as we seek to better navigate

our ever changing world      *Research Handbook on Intellectual Property and the Life Sciences* Duncan Matthews, Herbert Zech, 2017-06-30 Intellectual property IP is a key component of the life sciences one of the most dynamic and innovative fields of technology today At the same time the relationship between IP and the life sciences raises new public policy dilemmas The Research Handbook on Intellectual Property and the Life Sciences comprises contributions by leading experts from academia and industry to provide in depth analyses of key topics including pharmaceuticals diagnostics and genes plant innovations stem cells the role of competition law and access to medicines The Research Handbook focuses on the relationship between IP and the life sciences in Europe and the United States complemented by country specific case studies on Australia Brazil China India Japan Kenya South Africa and Thailand to provide a truly international perspective      Data Integration in the Life Sciences Naveen Ashish, Jose-Luis Ambite, 2015-07-07 This book constitutes the proceedings of the 11th International Conference on Data Integration in the Life Sciences DILS 2015 held in Los Angeles CA USA in July 2015 The 24 papers presented in this volume were carefully reviewed and selected from 40 submissions They are organized in topical sections named data integration technologies ontology and knowledge engineering for data integration biomedical data standards and coding medical research applications and graduate student consortium      *Digital Tools and Solutions for Inquiry-Based STEM Learning* Levin, Ilya, Tsybulsky, Dina, 2017-03-31 In the digital age the integration of technology has become a ubiquitous aspect of modern society These advancements have significantly enhanced the field of education allowing students to receive a better learning experience Digital Tools and Solutions for Inquiry Based STEM Learning is a comprehensive source of scholarly material on the transformation of science education classrooms through the application of technology Including numerous perspectives on topics such as instructional design social media and scientific argumentation this book is ideally designed for educators graduate students professionals academics and practitioners interested in the latest developments in the field of STEM education      **Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges** Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives      *Biological Collections* National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Committee on Biological Collections:

Their Past, Present, and Future Contributions and Options for Sustaining Them, 2021-01-29 Biological collections are a critical part of the nation's science and innovation infrastructure and a fundamental resource for understanding the natural world. Biological collections underpin basic science discoveries as well as deepen our understanding of many challenges such as global change, biodiversity loss, sustainable food production, ecosystem conservation, and improving human health and security. They are important resources for education both in formal training for the science and technology workforce and in informal learning through schools, citizen science programs, and adult learning. However, the sustainability of biological collections is under threat. Without enhanced strategic leadership and investments in their infrastructure and growth, many biological collections could be lost. *Biological Collections: Ensuring Critical Research and Education for the 21st Century* recommends approaches for biological collections to develop long-term financial sustainability, advance digitization, recruit and support a diverse workforce, and upgrade and maintain a robust physical infrastructure in order to continue serving science and society. The aim of the report is to stimulate a national discussion regarding the goals and strategies needed to ensure that U.S. biological collections not only thrive but continue to grow throughout the 21st century and beyond.

*Challenges of Interdisciplinary Research in the Field of Critical (Sex/ Gender) Neuroscience* Hannah Fitsch, Flora Lysen, Suparna Choudhury, 2022-02-17 *Reproducibility* Harald Atmanspacher, Sabine Maasen, 2016-07-05 2017 PROSE Award Honorable Mention The PROSE Awards draw attention to pioneering works of research and for contributions to the conception, production, and design of landmark works in their fields. Featuring peer-reviewed contributions from noted experts in their fields of research, *Reproducibility: Principles, Problems, Practices, and Prospects* presents state-of-the-art approaches to reproducibility, the gold standard of sound science, from multi- and interdisciplinary perspectives. Including comprehensive coverage for implementing and reflecting the norm of reproducibility in various pertinent fields of research, the book focuses on how the reproducibility of results is applied, how it may be limited, and how such limitations can be understood or even controlled in the natural sciences, computational sciences, life sciences, social sciences, and studies of science and technology. The book presents many chapters devoted to a variety of methods and techniques as well as their epistemic and ontological underpinnings, which have been developed to safeguard reproducible research and curtail deficits and failures. The book also investigates the political, historical, and social practices that underlie reproducible research in contemporary science studies, including the difficulties of good scientific practice and the ethos of reproducibility in modern innovation societies. *Reproducibility: Principles, Problems, Practices, and Prospects* is a guide for researchers who are interested in the general and overarching questions behind the concept of reproducibility, for active scientists who are confronted with practical reproducibility problems in their everyday work, and for economic stakeholders and political decision makers who need to better understand the challenges of reproducibility. In addition, the book is a useful in-depth primer for undergraduate and graduate-level courses in scientific methodology and basic issues in the philosophy and

sociology of science from a modern perspective A comprehensive insightful treatment of the reproducibility challenges facing science today and of ways in which the scientific community can address them Kathleen Hall Jamieson Elizabeth Ware Packard Professor of Communication University of Pennsylvania How can we make sure that reproducible research remains a key imperative of scientific communication under increasing commercialization media attention and publication pressure This handbook offers the first interdisciplinary and fundamental treatment of this important question Torsten Hothorn Professor of Biostatistics University of Zurich Harald Atmanspacher PhD is Associate Fellow and staff member at Collegium Helveticum ETH and University Zurich and is also President of the Society for Mind Matter Research He has pioneered advances in complex dynamical systems research and in a number of topics concerned with the relation between the mental and physical Sabine Maasen PhD is Professor for Sociology of Science and Director of the Munich Center for Technology in Society TU Munich and Associate Fellow at Collegium Helveticum ETH and University Zurich Her research focuses on the interface of science technology and society notably with respect to neuroscience and its applications **The Global**

**Governance of Genetic Resources** Florian Rabitz, 2017-04-28 How is access to genetic resources and the equitable sharing of the benefits arising out of their use to be guaranteed Exploring the subject comparatively with regard to intellectual property rights food and agriculture health and access to oceans this book creates a new theory of change in multilevel global governance Entrepreneurship, Innovation, and Platforms Jeffrey Furman, Annabelle Gawer, Brian S.

Silverman, Scott Stern, 2017-09-29 Despite recent advances in our understanding of how innovation and entrepreneurship impact the creation and appropriation of value numerous questions remain unanswered This volume draws together scholars working at the forefront of entrepreneurship strategy and innovation related domains to explore these questions

*Pragmatic Imagination and the New Museum Anthropology* Christina J. Hodge, Christina Kreps, 2024-03-14 Pragmatic Imagination and the New Museum Anthropology shifts museum anthropology's relationship to the broader field from marginal to central by revealing the sophisticated transdisciplinary praxis theory practice at the heart of current museum anthropologies The book features international case studies that operate at the interfaces of critical museology anthropology material culture studies art practice and more The theory of pragmatics proposes that meaning making is collaborative and best evaluated through its impact in the world Collectively the chapters in this volume evidence a pragmatic imagination at work as museum anthropology practitioners ingeniously combine inventiveness the possible and practicality the actual in ways that drive the field forward Defining museum anthropology as a pragmatic practice explicitly theorizes this work in order to mark its significance demystify its processes of knowledge production connect it more readily to debates within and beyond anthropology and facilitate critique *Research Handbook on Public Sociology* Lavinia Bifulco, Vando
