China L.H.M. Ling,2016-09-19 An inspiring reconception of the India China border as a space for the fluid exchange of culture trade and government *European Energy Security and US-Russian Competition* Ioanna Mavromati,2025-10-31

This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union s collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe s dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU s early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies

Sustainable Peace in Northeast Asia Yong-Shik Lee,2023-09-05 Sustainable Peace in Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the

In the Shadow of Kinzua Laurence M. Hauptman, 2014-01-22 The Kinzua Dam has cast a long shadow on Seneca life since World War II The project formally dedicated in 1966 broke the Treaty of Canandaigua of 1794 flooded approximately 10 000 acres of Seneca lands in New York and Pennsylvania and forced the relocation of hundreds of tribal members Hauptman offers both a policy study detailing how and why Washington Harrisburg and Albany came up with the idea to build the dam and a community study of the Seneca Nation in the postwar era Although the dam was presented to the Senecas as a flood control project Hauptman persuasively argues that the primary reasons were the push for private hydroelectric development in Pennsylvania and state transportation and park development in New York This important investigation based on forty years of archival research as well as on numerous interviews with Senecas shows that these historically resilient Native peoples adapted in the face of this disaster Unlike previous studies In the Shadow of Kinzua highlights the federated nature of Seneca Nation government one held together in spite of great diversity of opinions and intense politics In the Kinzua crisis and its aftermath several Senecas stood out for their heroism and devotion to rebuilding their nation for tribal survival They left legacies in many areas including two community centers a modern health delivery system two libraries and a museum Money allocated in a compensation bill passed by Congress in 1964 produced a generation of college educated Senecas some of whom now work in tribal government making major contributions to the Nation s present and future Facing impossible odds and hidden forces they motivated a cadre of volunteers to help rebuild devastated lands Although their strategies did not stop the dam s construction they laid the groundwork for a tribal governing structure and for managing other issues that followed from the 1980s to the present including land claims litigation and casinos The Making of a History Gregory M. Tobin, 2014-09-10 Walter Prescott Webb became one of the best known interpreters of the American West following the publication of The Great Plains in 1931 That book remained one of the outstanding studies of the region for decades and attracted considerable attention over the years for its unusual emphasis on the impact of geographic factors on the process of settlement Using manuscript sources some of which had not previously been available Gregory M Tobin has traced the elements that went into the planning and writing of The Great Plains and that account for its distinctive approach to the writing of a regional history Tobin emphasizes two aspects of Webb s life that molded the historian s outlook his early family life and community connections in West Texas and his admiration for the ideas of scholar Lindley Miller Keasbey Webb reacted strongly against the assumption that the only cultural values of any real worth emanated from the urban and sophisticated East he was determined to write the history of his own people in a way that would reveal the scale of their

anonymous contribution to American civilization By reverting to Keasbey's stress on the relationship between natural environment and social institutions Webb broadened his study to take in what he believed to be a distinct geographic environment The result was *The Great Plains* an assertion of individual and regional identity by a man with a personal stake in establishing the image of a distinctive Plains civilization Although *The Making of a History* is not a full biography of Walter Prescott Webb it is the first biographically oriented study of a man regarded as one of the twentieth century's major western historians It places his development within the framework of his intellectual and social setting and in a sense subjects his career to the same type of scrutiny that he advocated as the basis of the study of evolving cultures **Fighting the Great**

War at Sea Norman Friedman, 2014-10-22 The overriding image of the First World War is the bloody stalemate of the Western Front but although much of the action did occur on land the overall shape of the war _ even the inevitability of British participation _ arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in the desperate German attempts to deal with the American industrial threat which ultimately levered the United States into the war and thus a consequence of British sea control rn This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing it describes rapid wartime changes not only in ship and weapon technology but also in the way naval warfare was envisaged and fought Combat produced many surprises some like the impact of the mine and torpedo are familiar but this book also brings to light many previously unexplored subjects like creative new tactical practices and improved command and control rn The contrast between expectation and reality had enormous consequences not only for the course of the war but also for the way navies developed afterwards This book melds strategic technical and tactical aspects to reveal the First World War from a fresh perspective but also demonstrates how its perceived lessons dominated the way navies prepared for the Second **Earned Citizenship** Michael J. Sullivan, 2019-03-19

The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today But what do the state and citizens owe to unauthorized immigrants given non citizen contributions to their adopted country and connections to citizens who depend on them *Earned Citizenship* is a normative intervention in migration and citizenship studies that advances the proposition that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service to citizens in their adopted communities **Current**

Law Index, 2000 *Night Hunters* William Pace Head, 2014-03-18 In *Night Hunters* air power historian William P Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC

130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror Night Hunters offers a clear view of the role of gunships and of close air support in US wars In today s never ending brushfire wars the AC 130s continue to uphold their reputation for excellence

Defence Planning and Uncertainty Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future
