Helping Parents Understand Schools Lyndon G. Furst,2016-11-01 There is a great deal of misunderstanding about how schools in America function and what goes on in the typical classroom Parents even relatively young parents perceive that public schools are just like when they attended This faulty perception is held by a large portion of the general public In addition a number of aspects of schooling have come under close scrutiny by critics of the public schools resulting in a heated debate throughout the nation It is the purpose of this book to provide parents and others who are interested in the operation of public schools an alternative way of looking at publically supported education and the issues surrounding better educational practice The framework for this volume is the published articles of the author over the past 20 years in his weekly newspaper column A Different Perspective While no attempt is made to be comprehensive the 13 chapters cover a broad range of issues facing the schools The reader is treated to a fascinating look at the viewpoint of an experienced observer of these public institutions The author has changed his perspective over the two decades on only a few issues The book was written with the average reader in mind It does not contain a large amount of educational jargon although the issues are approached with enough depth to be useful to the professional educator Throughout the entire volume the author

a simple technique that puts this kind of class within every teacher's reach. The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion, lead and support one another's learning and build community. It's proven to work across all subject areas and with all ages and you only need a little know-how, a rubric, and paper and pencil to get started. As students practice Spider Web Discussion, they become stronger communicators, more empathetic teammates, better problem solvers, and more independent learners—college and career-ready skills that serve them well in the classroom and beyond.

Educator Alexis Wiggins provides a step-by-step guide for the implementation of Spider Web Discussion, covering everything from introducing the technique to creating rubrics for discussion, self-assessment, to the nuts and bolts of charting the conversations and using the data collected for formative assessment. She also shares troubleshooting tips, ideas for assessment and group grading, and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that's both revolutionary and truly inspiring.

Handbook on Teaching Social Issues Ronald W. Evans, 2021-05-01 The Handbook on Teaching Social Issues, 2nd edition, provides teachers and teacher educators with a comprehensive guide to teaching social issues in the classroom. This second edition re-frames the teaching of social issues with a dedicated emphasis on issues of social justice. It raises the potential for a new and stronger focus on social issues instruction in schools. Contributors include many of the leading experts in the field of social studies education. Issues-centered social studies is an approach to teaching history, government, geography, economics, and other subject-related courses through a focus on persistent social issues. The emphasis is on problematic questions that need to be addressed and investigated in depth to increase social understanding, active participation, and social progress. Questions or issues may address problems of the past, present, or future and involve disagreement over facts, definitions, values, and beliefs arising in the study of any of the social studies disciplines or other aspects of human affairs. The authors and editor believe that this approach should be at the heart of social studies instruction in schools.
