MARKING GUIDELINES

ACCOUNTING (PAPER 1)

12 pages

MARKING PRINCIPLES:

1. Unless otherwise stated in the marking guidelines, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
3. Unless otherwise stated, give full marks for correct answer. If answer is incorrect, mark workings.
4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer). Note: if figures are stipulated in memo for components of workings, these do not carry the method mark for final answer as well.
5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or – sign or bracket is provided, assume that the figure is positive.
6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
7. If candidates provide more than the required number of responses, inspect all responses to give benefit to the candidate. Penalties may be applied for foreign entries if candidates earn full marks on a question (max. -2 per Q).
8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
9. Where method marks are awarded for operation, marker must inspect reasonableness of the answer.
10. Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷, or per memo.
11. In calculations, do not award marks for workings if numerator & denominator are swapped – this also applies to ratios.
12. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a 0.
13. Be aware of candidates who provide valid alternatives beyond the marking guideline. Note that one comment could contain different aspects.
14. Codes: f = foreign item; p = placement/presentation.

The Years That Matter Most Paul Tough,2019-09-12 What has gone wrong in our universities And how do we make it right When Amy applied to university she thought she d be judged purely on her merits But she never thought that her family background would have as much impact on her future as her grades When KiKi arrived at university she knew she could be the only black woman in her class But she didn t know how out of place she would feel nor how unwelcoming her peers would be When Orry graduated from university he was told he d probably land a six figure salary But he wasn t told he d end up barely scraping a living wage struggling to feed his children Drawing on the stories of hundreds of American students *The Years That Matters Most* is a revelatory account of a university system in crisis Paul Tough bestselling author of *How Children Succeed* exposes a world where small town colleges go bust while the most prestigious raise billions every year where overstretched admissions officers are forced to pick rich candidates over smart ones where black and working class students are left to sink or swim on uncaring campuses Along the way he uncovers cutting edge research from the academics leading the way to a new kind of university one where students succeed not because of their background but because of the quality of their minds The result is a call to arms for universities that work for everyone and a manual for how we can make it happen **Official Gazette** Philippines,2004 *Monthly Catalogue, United States Public Documents* ,1965 **Who Gets In?** Rebecca Zwick,2017-05-15 On the disputed topic of U S college admissions everyone agrees that this high stakes competition is unfair But few agree on what a fair process would be Stressing transparency in evaluating applicants Rebecca Zwick assesses the goals and criteria of different admissions policies and shows how they can fail to produce the desired results *Cognitive Sciences and Education in Non-WEIRD Populations* Marcus Vinicius Alves,Roberta Ekuni,Maria Julia Hermida,Juan Valle-Lisboa,2022-08-27 This book aims to present theoretical and practical innovations in the cognitive sciences and education fields focusing on studies and research conducted with non WEIRD i e western educated industrialized rich and democratic populations especially from Latin America Cognitive sciences and neuroscience have

increased exponentially their knowledge in the last three decades and today there is a corpus of knowledge about our central nervous system and its functioning that adequately understood has promising contributions for the educational field. Most of this knowledge however comes from central countries North America Europe and is based on studies conducted on what has been called WEIRD populations. Much less is known about how the integration of cognitive sciences and neuroscience could impact education in non WEIRD populations which represent the great majority of the world's population and have quite diverse cultural and social characteristics. So the main aim of this book is to present a non WEIRD scientific approach to problems in the cognitive sciences neuroscience and education fields. Research presented in this contributed volume takes advantage of the diverse populations that characterize developing countries to explore how underrepresented populations learn what works and what does not for cognitive science and education not only for the developing world but also for understanding diversity in the whole world. Departing from this focus on diversity chapters in this book present studies on theories beliefs and misconceptions about the relationship between cognitive sciences and education child and adolescent cognitive development mathematics and language academic performance and cognitive interventions to improve educational practice. Cognitive Sciences and Education in Non WEIRD Populations A Latin American Perspective will be a useful resource for both cognitive scientists and educational researchers interested in developing a more culturally sensitive approach to basic and applied research on cognitive sciences of education.
